Pit strike vote upsets leader

Labour rejects Kinffock's reselection proposal

proposal backed by Mr Kinnock for one member, one vote" for reselect-

Labour's delegates carried motions condemning police violence and called for laws to restrict police action during strikes.

From Julian Haviland Political Editor Blackpool

The Labour Party conference, while proclaiming its support for Mr Neil Kinnock, the leader it elected a year ago, yesterday refused to follow his advice and governing the reselection of Labour MPs. change the troublesome rules

The proposed change was the first contentious matter to which Mr Kinnock had publicly lent his full authority, and so deliberately hazarded his stand-

ing in the party.

The immediate effect of the reselection vote, in which the conference rejected his guidance by a ratio of seven to six, was therefore hurtful to him. It was also worrying for the two or three dozen Labour MPs who are in some fear under the present rules of losing the support of their local parties and being dumped.

The change was intended to increase their protection when the resecction process begins in December by giving them at least the chance of appealing over the heads of hostile activists to the full membership. As so often, the conference

spoke yesterday with more than one voice. It twice rejected, by more than two million votes or more than two to one, resolutions which demanded no

Some in the party leadership were able to argue from that last night that the conference had therefore voted for change, and that Mr Kinnock and the new national executive committee, to be elected today might be entitled to delay reselection for 12 months while a more acceptable formula is found. But the specific Kinnock plans, devised by Mr John Evans, MP for St Helens North

Committal proceedings were up to me and handed me a writ. 15 its thirtieth week, declared the Labour Party conference unlawful. It is understood that met in Blackpool. vesterday's committal move-agains: Mr Scargiil stemmed

It seems clear that the two orkshire miners will ask the High Court for the imprisonment of Mr Scargill on the grounds that he is in contempt of last week's declarations.

Mr Scorpill has made no secret of his intention to ignore the court's decisions. His defiance was first broadcast on Charnel 4 News on Friday night

The legal notice gives Mr Scargill two days to appear in court on Thursday to answer the committal proceedings.

The notice alleges that he is in contempt for defying High Court orders that: (1) He should not threaten disciplinary proceedings against miners who cross NUM picket lines; and (2) He should not continue to declare the strike in Yorkshire. 'as official when the court has ruled that it is not so.

The action takes the form of a committal order and an order for sequestration of national

From David Miller, Peking

Compulsive British TV viewers of the Olympics should brace themselves for another sicepless ali-night marathon in 1988. Negotiations in the next few months between the Segui organizing committee, the IOC and the three major North American broadcasters - ABC, NBC and CBS - seem sure to capitulate to the demon God, US prime time.

New York money, courtesy of satellite, calls the tune for the Olympic piper. This is the first time the Games will have been subordinated in such a way. The Secul Olympic committee asked the television compared with the issue price of between staging the games at 165p.

normal Korean time or at an hour to suit the United States.

The answer was somewhere around \$500m (£400m). North American TV would require three sports in particular athletics, swimming and gymuastics - to be screened between 0900 and 1100 hours Korean time, which is 2000 to 2200 New York, or 0100 to 0300 London

ABC paid \$225 for the LA rights, and Seoul has been nursing giddy ideas of demanding 5750m. But American TV has come back with two arguments: lit must be in their prime time, in addition to which sport is a declining commercial market as English football is discovering. The IOC and the Inter-

soen how far they are prepared

to compromise, though cynics already have little doubt. When did any sport last turn down

Juan Samarauch, the IQC president, and Primo Nebiolo, president of the IAAF, stressed in Seoul that the health of competitors has to be protected. Yet any argument for conventional hours is undermined not only by professional boxers stepping into the ring in the middle of the night in central Africa to suit the small screen, and even track races in Europe commencing at 10.30 for New Yorkers' convenience, but by rowers in Los Angeles having got up at 4 am to start competing at 7.30 simply because of a cross wind on national Sports Federation Lake Casitas. have to make up their minds

Britain is

ordered to

pay for

turkey ban

The Government may have to pay up to £19m in damages to French turkey farmers after a High Court decision yesterday.

Mr Justice Mann ruled that farmers were entitled to be compensated for lost business

caused by an import ban imposed by Britain between September, 1981, and November, 1982, which the European Court of Justice declared illegal under the Treaty of Rome. The Ministry of Agriculture, which originally imposed the ban on the pretext of preventing the spread of Newcastle disease, a virulent form of fowl pest, contended that the farmers were

entitled only to the European court's declaration that Britain had failed to fulfil its obli-

gations under EEC law, They could not also sue for damages.

But the judge upheld the farmers' allegation that the

Government was guilty of improper action in public office, which is a ground for claiming

damages. The Solicitor-General, Sir

Patrick Mayhow, QC, acting for

the ministry, was given leave to appeal, and the action for damages will not be heard until the Government has decided

Solicitors in Scotland | house down resist advertising

By Frances Gibb Legal Affairs Correspondent Solicitors in Scotland were urged yesterday to follow the example of their colleagues in England and Wales and adver-

tise their prices and services.
The Scottish Consume Council said that advertising by Scotland's 5,300 solicitors would be of great benefit to the consumer and mean "the possibility of reduced fee through greater competition".

Mr Peter Gibson, the coun cil's director, said prospective clients might also be able to choose from the advertisements a particular lawyer who specialised in the kind of situation they

But the Law Society of Scotland yesterday said there were no immediate plans to allow advertising by individual solicitors along English lines.

Mrs Janice Webster, for the society, said the question was constantly under review even in April solicitors at the society's annual general meeting voted overwhelmingly against

advertising.
They fear that it will not benefit the consumer, who will in the end have to pay for the advertisement", she said. "There is alos the danger that only the big boys, who are not necessarily the best boys, will be able to take full advantage of advertising."

But she added that solicitors in Scotland were already al-lowed a considerable freedom to advertise. They could promote their conveyancing services when dealing with property; and groups of solicitors running property centres could give their names under advertisments of properties both on television and readio.

Corporate advertising by the society and by local faculties (law societies) were also allowed, she said.

 Many solicitors believe the new advertising guidelines are too restrictive, according to research by the Solicitors' Law Stationery Society, a legal supplier, which said it would be launching a marketing service

only crime was the desire to work and to save the industry and jobs of mining communi-tites. He successfully com-mended the NUM motion reaffirming the Labour Party's commitment to the Plan for Coal, a commitment that should be in its next manifesto.

The widow of a miner, Mrs Muriel Williams from Maesteg, also got a standing ovation for a speech in which she said that miners' wives would see that miners did not starve. "The miners' wives are as determined to win as any Margaret

Mr Tony Benn, MP for Chesterfield and a former Secretary of State for Energy, replying to the debate, said the Government had planned the dispute years ago and had budgeted for it. The Labour Party wanted to make clear that

it backed the miners all the way. The conference duly did carry with only a few hands raised against both the NUM resolution and the recently published national executive statement, which Mr Benn said, did not criticize the NUM for its handling of the dispute.

Although Mr Benn asked the conference also to carry a motion calling for a freeze on all further development of Bri-tain's nuclear power, it was thrown out in the first card vote of conference by 3,483,000 votes to 2,967,000.

Mr Scargill said that for seven months. British miners, their wives and families had been involved in an historic struggle. The NUM had found itself in a position of having to defend the coal industry, its jobs and its communities against the economic insanity of Mrs Margaret Thatcher's monetrist philosophy.

The Government's decision last year to appoint Mr lan McGregor as chairman of the NCB was designed to provoke the NUM. This had followed a period when the Government had firmly believed it could pursue poticies which would

"For God's sake give your support to our membership and take us on the way to victory", he declared.

As for violence on the picket lines, Mr Scargill attacked state violence against miners whose only crime was the desire to work and to cayle the induction the coal output was 480m tonnes.

"There is a deliberate attempt to met the party to mislead not only the NUM but also the general public on concern of the growing number of people about the wisdom of making miners redundant – it is as much as keeping these pits on the cost of closing pits and making miners redundant – it is as much as keeping these pits open and the jobs secure. I am sheet mentality of this Government.

To do so they must assess what it would mean for the economy and environment. That sort of analysis had never

economy and environment. That sort of analysis had never ment. We are not talking about the miner whose job is lost - it is not his job to sell. The jobs taken place, even under a

Labour government.

Ray Buckton, general secretary of Aslef, said he joined with the millions of people who applauded the miners, their wives and children who could see their communities being absolutely ruined by the vicious attack from the Government. -

In an appeal carried over-whelmingly trade unionists were asked to stand by what was a basic principle of the move-ment - that was unless there was an agreement with the union concerned do not pass official picket-lines.

Mr Eric Hammond, general secretary of the electricians' umon, EETPU, was hissed and booed when he said the NEC statement demonstrated what was wrong with the policy-making in the Labour Party.

"There is no attempt to analyse the real problems, underlining the conduct of this dispute, no attempt to under-stand why the refusal to ballot the membership had split the NUM, no call for the TUC guide on conducting disputes to be observed and, most shameful, no demand for the violence and hooliganism on the picket line to be stopped.

Mr Benn, replying for the NEC, recommended acceptance of both motions. He said that the Government had planned the dispute years ago.

use the DHSS to starve the miners into submission and had failed. They had tried to use the NCB to bribe the miners with redundancy pay. They had used riot police and mounted police to harrass and assault miners to seek to eriminalize those on whose skill and dedication the future of the country depended.

The Government had tried to use the magistrates by manipulating the bail conditions and to punish people who had never been put up for trial by imposing restrictive bail con-

Clwyd, MP for Cynon Valley. stated for the national executive, in asking delegates to accept three long composite resolutions containing a host of

Mrs Clwyd, and others in the debate, strongly attacked Conservative housing policy and particularly its spending cuts which amounted to three quarters of all the Governments's public expenditure cuts since it took office.

The first composite motion carried called for a housing policy which offered a right to choose both to those who wanted to rent and those who wanted to buy. Although the right to ret was central to a social policy. It called, among other things, for parity of financial treatment between tenures and the right in certain rircumstances to instruct authoites to acquire homes to rent where they could not offer satisfactory homes from stock.

The second motion, moved by the Union of Construction, Allied Trades and Technicians, called for the "right to buy" provisions of the housing acts, 1980 and 1984, to be repealed, although it believed that a Labour government the change argued that the constituency party management committee was the only occupied. Sales should be at vacant possession value and

> without discount. The third motion urged parity of financial treatment between tenures, positive encouragement of housing investment, and recognition of the evere deterioration of low and high-rise system-built properties. On that the government should accept its financial responsibility so that the coun-

They had meant well with the industrialized building of the 1960s but the voices of the people who were to live in these homes was never heard. That must not happen again. They must consult and listen and that meant strengthening tenants' rights, giving power to tenants,

She added: "We say whatever people decide to do, whether to Housing she said, had been affected worse than any other sector. Standards had been scrapped and private builders were putting up more and more were putting up more and more tried to build build be put back to the top of our agenda."

government there would be need for a sustained programme of housing investment to produce good quality housing for all, to tackle the problems of design and housing defects, and to put building workers back to

They wanted to give people a real choice between renting and owning at a price they could afford. Since the profit motive ruled in housing, she added, they needed to tackle and take more public control of finance and the building industry.

Mr John Battle (Leeds North-West) said the party had to new emphasis on rights and choice. Councils would have to buy houses on the private market in order to make them available for renting.

Mr Charlie Kelly, a member of the executive council of supported the right of individuals to buy their own home, what they objected to under Tory policy was the inadequate provision of housing and the preferential terms offered to those claiming the right to buy. The Cabinet appeared to be backing the black economy as the means of regenerating investment

Mr John Fraser, MP for Norwood, an opposition spokesman on housing, said the resolutions emphasized that people wanted variety in housing, choice, and good quality. There was no better time than houses should be taken by now to reinvest in housing and individual authorities. They prevent cities from falling apart.

Left pushes for further concessions on defence

By Philip Webster, Political Reporter

row to adopt a defence policy containing for the first time an unequivocal commitment to remove from Britain all nuclear weapons and American nuclear bases, was faced yesterday with demands from the left to go further and promise the closure of all American non-nuclear bases as well.

With the ink barely dry on the new policy statement, Defence and Security for Britain in which the party's centre right has made significant concessions, the left wing has reopened the argument.

Sunday's vote in the national executive committee in which 10 of the 29 members supported the proposition that the NEC should have tomorrow accepted a composite motion calling for the closure of all American bases, dismayed the centre right and led to a bitter exchange between Mr Roy Hattersley, deputy leader, and Mr Tony Benn, who insisted that the votes of individual members

should be recorded. It was confirmation that the leadership's hopes, that the defence statement might end desence statement magnification internal damaging arguments about defence and alow the party to go forward to the next election with what it has called an intellectually coherent policy, are unlikely to be realized.

The vote led to complaints by the centre right of irresponsib-lity by the left and of its readiness to tear up policy agreements almost as soon as they were made. The centre right has regarded the strength of the new statement as its

they believe would have been jeopardized by support for the Mr. Benn and his colleagues of information.

commitment to Nato, which

The Labour party, set tomor-w to adopt a defence policy ontaining for the first time an motion to be shelved and with the help of the 1,250,000 block vote of the transport workers, that will happen. But left wing NEC members made clear yesterday that they would not let the issue drop.

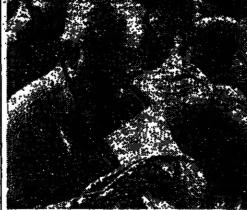

The left's move came as leading right wingers planned speeches in which they are to set out reservations about the new policy. Mr James Callaghan, the former Prime Minister, is to address a fringe meeting in Blackpool tonight called by the Labour Defence and Disarmament Group in which he is expected to voice opposition to the removal of American bases.

The Transport and General Workers' Union is helping the leadership to resist left-wing demands to cut defence spendlevel of that of Britain's European allies, within the lifetime of a Labour govern-

Mr Ron Todd, the general secretary-elect of the union, will move the main defence motion in the debate tomorrow, which will support a reduction in military spending but without making any commitment on the level. The change in the union's posture since last year's conference is regarded as highly significant by the party leader-

Clergy challenge Archbishop on need for belief in Virgin Birth

John Habgood, has been challenged by a group of clergy in church,"
the North-east to state whether The belief in the fact of the Virgin their tactics in the wake of Birth and the Resurrection - Bishop Jenkins's consequently represented by the "empty tomb. - are necessary in bishops of the Church of England. The North East Diecesan Evangelical Fellowship adopted a statement at its ing last month which called on Dr Habgood to clarify remarks he made before the consecration of Professor David Jenkins as Bishop to Durham. Dr Habgood had apparently

driven a wedge between doc-trine and historical fact, the statement said. They have drawn up three questions; whether a man to be consecrated a bishop may be agnostic about the Virgin Birth and the literal Resurrection; may be disbelieve in it, and may be treat these beliefs as optional for the church, even if he holds

They state they are not "talking about the standing of individuals in the sight of God", but "what teachings and beliefs are compatible with being a bishop in the Church of trating on such issues.

The Archbishop of York, Dr God. For this has implications for the doctrine of the whole

The statement went on to say that a doctrinally divided church was weakened in its contribution to social moral questions. "We believe it fair to seek for answers because although thee are subtehies in belief, belief is not so subtle."

It called on any bishop-elect to make a declaration of his beliefs before consecration. Otherwise bishops would lose authority, particularly as the group believed bishops were in contravention of the church's canon law if they did not uphold traditional interpretations of doctrine.

"When there is confusion over teaching of the Resurrec-tion, we judge it to be of there utmost seriousness", the state-ment goes on. We believe the 'empty tomb' to be an essentia witness to the nature and the fact of the Ressurection. The group denies that it is

Bishop's reply to Minister

Government accused of not caring

The following is the text of a letter from the Bishop of Durham, the Rt Rev David Jenkins, to Mr Peter Walker, the Secretary of State for Energy, about his remarks on the miners' dispute.

Dear Mr Walker. Thank you for your reasoned and informative letter of the 24th September. I greatly appreciate both the courtesy and the compassion you express I am glad too, of the opportunity for calm but urgent discussion between Christians about the frighteningly difficult problems which we all face, and about how our faith should interact with our practical and political decisions and

The difficulties and differences between us seem to me to stem principally from two things. Firstly, I do not doubt your personal concern, nor your intentions, nor the value of many of the measures which you write, Unfortunately, the Government to which you belong does not seem to care for the steadily increasing number of le who are unemployed, and otherwise marginalized in and does not seem to care that it does not seem to care, (You probably saw Mr Pym's gently cautious words on the subject in The Times of September the 19th in an article headed "Miners: Now for

the Human Touch"). On all the statistical tables known to me it seems a simple matter of fact that government's fiscal measures consistently improve the lot of (to use titles from one such table) "senior managers" and "company directors" while causing losses to "jobless man with family" and "semiskilled worker".

"semi-skilled worker".
This seems a gratuitous refusal to care and a rather insulting determination to make sure the already under-privileged bear an even greater share of the cost of our undoubted economic difficulties, and of our undoubtedly required greater economic realism. It is also difficult to believe that the Government does care for all the Government does care for all the members of our society when cuts are repeatedly made on those services which are of particular value to the poor, but money can always be found for military adventures in the Falklands, pretending to be still a great power in defence matters or keeping up the police forces. I do not say that we can do without either defence or police expenditure, but the emphasis does seem to be persistently on

sis does seem to be persistently on non-caring and agressive directions. This leads to the second principal point. I agree with you that Mr Scargill's personal intransigence has played, and does play a very considerable part in keeping the situation over the mines dead-locked. I would guess that quite a few miners would like to see a situation rapildy developing in which they could do without Mr

situation rapildy developing in which they could do without Mr Scargill's invansigence.

But it is necessary to ask why Mr Scargill gets the (by no means complete, but very strong) support that he does. The answer surely lies on the one hand in the general economic situation. Redundancy payments are all very well, and the redundancy arrangements of the NCB may well be the envy of threatened workers elsewhere but threatened workers elsewhere, but redundancy means both no further jobs for the redundant. and no jobs

for their children. Communities and a whole way of there are no alternatives elsewhere. This is a vital difference between closing mines in the 1960s and early 1970s and closing them now. I am sure that many miners and their families remain doggedly committed to the strike not for money, but for a way of life. Whatever Mr Scargill may be after, they are seeking not revolution, but a future Scargill's intransigence is im-mensely reinforced by a government style which seems to make a virtue of confrontation. I had boped, when of controllation. I had belied, where I first drafted by Enthronement sermon two or three weeks before the event, that the page on the miners strike could be either on The Jimmy Young Programmereported in the papers of September the 20th convinced me that, with great sadness and perplexity, I could not alter a word. We seem to have intransigence confronted by intran-

sigence, and this, I believe, is the death both of true politics and true

You yourself make a splender point towards the end of your letter about compassion and efficiency. O course, compassion does not get you very far in dealing with the problems of millions. We must have efficient production of the means of compassion. But surely this implies negotiating with and not destroying regonating with and not destroying communities, groupings, and organizations which have grown up over the years, and which represent, however imperfectly, the legitimate rained members of our so

It means developing a politics of the possible which carefully and compassionately considers the cost of any particular campagin in regard

strike going on for more than a year then it seems to me to have lost all sense of what a community is and what a country is. Something must be done speedily to stop communi-ties learing themselves apart, to stop bully boys in both mining pickets and police forces calling the tune, to stop ordinary families coming near to starving, and to stop the mining

industry destroying itself.

A government should be strong enough to be able temporarily to accept a compromise or check to its overall policies for the sake of local communities and particular per-sons. Such compromises would add Mr Scargill continues to refuse to negotiate on the one issue he says is not negotiable. I think I should not negotiable. I think I should challenge him to a "cooling-off" period. Let both (all) sides recognize the status quo at the moment. Where pits are effectively working leave them to work effectively; where pits are not working leave them not working — without either picketing to observe the medican enterprise to observe the medican enterprise. picketing to change the position of police to make sure that very small numbers of men have "their right to

the pits alone, and let them make their own peace with local police and local miners. Meanwhile, resume all possible negotiations, using all parties that are available or

possibly make to break this dreadfully threatening deadlock, and free us all for further chances to tackle out problems without confrontation politics at every turn.

As you say: "We must do out bes to assess who is the true enemy. think that Christian insight would encourage us to recognize that pan of the enemy is always within ourselves, and that no "they", "he" or "she" should ever be treated as the total enemy, and the sole enemy This does not make for simplicity o party slogans. But I think it does make for a compassion which, if exercized politically, might greatly add to efficiency and hope.

229 rural schools to close

One in 10 primary schools in ngland and Wales has fewer tan 50 pupils, but 229 of these will close this year. England and Wales has fewer than 50 pupils, but 229 of these will close this year, according to figures published today by the Chartered Institute of Public

Finance and Accountancy.
The small schools are almost all in rural areas. Education authorities are also closing. The institute's figures show some larger primary schools. Of that the number of pupils has those with more than 400 fallen by 15.5 per cent since pupils, 58 will close this year. 1977.

At the other end of the secondary spectrum, the falling pupil population means that there will be 30 more secondary

schools with fewer than 400 pupils this year.
The institute's figures show

The changing pattern in school sizes is reversed in secondary schools. Only one in London, WC2, £14.

Chun takes North's gifts with pinch of salt

From David Watts

Tokyo
After a weekend of unprecedented contact between North and South Korea, realism retuned to the peninsula yesterday in a tough armed forces day speech by President Chun Doo Hwan of South Korea.

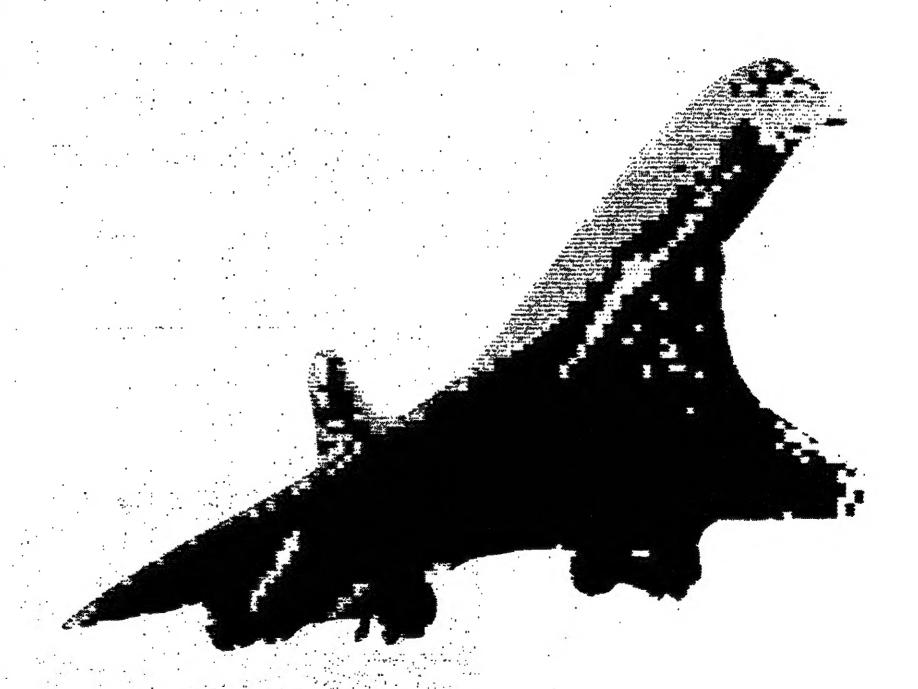

Reviewing a massive display of South Korea's military capability, both imported and domestically produced, the President warned that the North's new, more friendly approach must be treated with scepticism, especially as it has recently been strengtyhening its forces at the demilitarized zone,

Even as delayed flood relief supplies were still being unloaded at South Korean ports, he President gave warning that Pyongyang's peace offensive must be treated with caution. "In view of our past experience we cannot entirely free ourselves from concern and misgivings. As fellow Koreans we sincerely hope that there are no wicked schemes or ulterior motives lurking behind there smiles." he said.

South Korea claims that the North has recently been deploying large tank units, long-range artillery and guided missiles near the demiliarized zone

With Home-produced missiles, anti-aircraft guns, ar-moured personnel carriers and self-propelled howitzers on display, the South's strength was left in no doubt.

Problems mount for German Chancellor

Nonchalant Kohl facing renewed attacks on his style of leadership

Chancellor Helmut Kohl began his third year in office yesterday as an election setback and a fierce attack from his long-standing rival, Herr Franz Josef Strauss, once again raised questions about his leadership

and the effectiveness of his fissiparous coalition govern-In an outspoken and clearly calculated attack, Herr Strauss, the Bavarian Prime Minister whom Herr Kohl has striven to keep out of his Cabinet, drew up a critical balance at the weekend of the Government's record. He

criticized Bonn's policies on Europe, the lack of new direction in foreign policy and what he called the undue influence of the Free Democrats in the Cabinet. His attacks, highlighting the chronic bickering between the two junior partners in the coalition, caused particular resentment in Bonn both for their timing and for the way they identified the Chancellor with the hapless Free Democrats, whose electoral unpopularity has now jeopardized the party's very existence.

The Strauss outburst, motivated as much by the veteran politician's frustation at being thwarted in his ambition to play a big role in the Government as by his calculation that the centre-right coalition is in serious trouble, coincided with the rebuff voters in North Rhine-Westphalia gave the Christian Democrats in Sunday's local elections.

Herr Kohl has reacted with characteristic nonchalance, seeking to play down these latest setbacks to his leadership. But friends and commentators have been making it plain to him that this determination to "sit out" the various crises that have beset his Government in recent months carries the risk that his strong nerves and unflappability, long seen as an asset in his political style, are increasingly being taken by the electorate as signs of weakness and lack of political imagin-

Post-UN gloom in Moscow

Moscow From Richard Owen Soviet officials said yesterday

that President Reagan had "thrown down the gauntlet" by refusing to change his position during talks with Mr Andrei Gromyko. But other Soviet sources said Moscow was willing to "do a deal" with Mr Reagan in the long term, provided that he gave ground. Sources said the Politburo was now considering its next

move on aims control "very, very seriously" following Mr Gromyko's return to Moscow

on Sunday.

The Soviet press has taken a gloomy view of Mr Gromyko's talks in New York and Washington, in contrast to the relatively optimistic comments of Reagan Administration officials. Mr Robert MacFarlane, the president's National Security Adviser, suggested that arms control talks could resume within months.

Diplomats said in Moscow that Mr Gromyko had at least resumed the Soviet-American dialogue at a high level, and Soviet comment could have been worse. Tass said on Mr Gromyko's return that he would maintain contact with Mr George Shultz, the American Secretary of State, as and when necesss

when necesssary.

Neither Tass nor Pravda has, however, made any positive assessment of the state of East-West relations after Mr Gromyko's trip to the United States, and the press has continued to attack Mr Reagan as aggressive and militaristic. "It is up to Mr Reagan to show that he can be trusted and can be flexible," one Soviet source said. "It is for the Americans to make concessions."

Diplomats said that Moscow wanted Mr Reagan to translate his promise of restraint at the United Nations into a concrete agreement to a moratorium on space weapons testing.

Mr Gromyko has already

Mintoff in surprise **UK** visit

By Our Foreign Staff

Mr Dom Mintoff, Prime Minister of Malta, arrives in Britain today for a surprise visit, arranged at his own request:
He will see Mrs Margaret

Thatcher tomorrow, as well as Sir Geoffrey Howe, the Foreign Secretary, and Mr Norman Tebbit, Secretary of State for Trade and Industry.

Not even the Maltese High
Commission knew details of the

visit last night, although White-hall sources said that "bilateral matters" as well as trade and tourism were on the agenda. It will probably be Mr Mintoff's last official visit as Prime Minister. Informed sources say he will relinquish both that post and the leader-ship of the Malta Labour Party on October 8, and will first announce his decision at a party rally on Saturday. His successor will be Dr Carmelo Mifsud Bonnici, Deputy Prime Minis-

ter and Minister of Education.

anny", not least because of the growing evidence of its indiscipline and its responsibility for the massacre of 13 civilians in the village of Sohmor two weeks ago. The only administration in the south acceptable to the Lebanese would be a joint force of IDs and International South S of UN and Lebanese government troops.

detained

court today.
Three of the six, Mr George Sewpersadh and Mr J Naidoo, the president and vice-president of the Natal Indian Congress, and Mr Mewa Ramgobin, another senior NIC official, were among more than 40 people facing charges arising out of a demonstration last November in Durban.

The Attorney-General of Natal unexpectedly withdrew charges against all the accused yesterday, and a related court appearance scheduled for today fell away. Had the three consulate fugitives failed to appear, the court could have issued a warrant for their arrest, and thus possibly changed their

diplomatic and legal status. Britain has argued that it is entitled, under the Vienna Convention, to afford the "Durban Six" sanctuary on humanitarian grounds because

they are threatened with detention without trial and have not been charged with any specific offence. The British claim to have been unaware until a few days ago of the charges now dropped.

The next step in the legal tussle over the six is a Supreme Court ruling, expected some time this week, on their appeal against the validity of the detention order issued against the meanly last month by the Minister of Law and order. Ghanaians send 10 to firing squad

Accra (AFP) - The Ghanaian authorities have executed 10 people convicted of various crimes. They included a relative of the head of state who was earlier acquitted on charges of murder but then rearrested on

his orders.

The executions by firing squad, which took place on Saturday, followed public hear-ings in which three of the accused were convicted of murder, five of armed robbery and two of smuggling, Accra radio said:

Those executed for murder included Richard Nii Amo Addy, a member of the security forces and relative of Flight-Lieutenant Jerry Rawlings, the head of state.

Two years after democratic rule was restored in Bolivia, President Siles Suazo is wrestling with an economic crisis of gargantuan proportions. In the first of two articles. Patrick Knight Reports from La Paz on the reaction of political groups to the worsening situation.

Despite growing economic chaos, Bolivia is paradoxically further away from a military in its turbulent history.

Inflation is now running in excess of 1,000 per cent, the world's highest and anarchy is gaining ground. There are endless strikes, and demonstrations, factories and mines have been taken over, roads have been blocked, and many goods are in chronic short supply. Some goods and services cost less here than anywhere in the world, Others are more expensive, as the economy careers out of control.

President Hermin Siles

Suzzo inherited a difficult economic situation when he took power two years ago, but the present state of affairs has been largely brought about by his attempt to please both his main groups of supporters at the same time – the middle and

the same time – the middle and the working classes.

But he has ended up satisfying neither, although a majority of Bolivians still tolerate the economic mess preferring it to the tough military rule that went before. Despite his declining popularity, it still seems to be in nobody's interest – armed forces, political parties, or any forces, political parties, or any of the neighbouring powers which have so often interfered in Bolivis in the past - to attempt to remove the 70-year-old President from power, and there is a political deadlock.

Political deadline favours President

Chaos but no coup in the offing

Leading actors: Veteran union boss Juan Lechin (left);

preparation for the next elec-

tions. Although it claims to

It seems likely that Senor Siles Suazo will complete his four-year term, and take the country to elections in 1986, although they might be brought forward if things deteriorate

much more.

President Siles took over a prostrate country in 1982 after more than a decade of military rule, during which time the country's debt had climbed from \$700m to more than \$5 billion – one of the world's largest per capita, and extremely onerons for what is still a mainly subsistence economy, with virtually no industry to

generate foreign exchange.
Señor Siles succeeded General Luis Garcia Meza, closely connected with Bolivia's booming narcotics traffic. Exports of some 200 tons of cocaine paste have put pressure on the a year are thought to earn Government to improve work-

succeeded. Average incomes were down by 35 per cent in the first eight months of this year. One notable change is the

growing strength of the pea-sants' unions which now occupy the second position in the COB hierarchy after the miners. Four years ago hundreds of peasants blocked all access to

the capital, La Paz, for three weeks, cutting off its food supply, in protest at the Government's efforts to introduce austerity measures im-posed by the IMF. The now vociferous peasants are likely to play an increasing role, the country still being predominantly rural.

Bolivia's large neighbours, Brazil and Argentina, have often involved themselves in its affairs, and both General Banzer, and General Garcia Meza came to power with help from abroad. However, these countries, as well as others in Latin America, the United States, and Western Europe, view the Siles Suazo Govern-ment with great indulgence, as being very positive for democracy in the region. They have been prepared to overlook Bolivia's failure to pay interest on the foreign debt, and neighbours have even come up with fresh soft loans.

With a strong socialist element - there are two communists in the centre-left administration - Bolivia has permitted an increasing Soviet presence in recent years. However, the Russians also want continued stability, and keep a low profile. Reports of Cubans training in the interior have not been confirmed by even the most rabid anti-com-

ER CARS. BETTER DEALS. BETTER PRICES.

RY US!

Graham Greene was sitting at his daughter's Christmas, dinner table watching his grand-children pull crackers when the idea for Dr Fischer of Geneva, alternatively The Bomb Party, came to him; not a thought of good cheer born of the familial scene before him but, characteristically perhaps, of sin and a deadly one at that - greed. deadly one at that - greed.

In such a situation, with ourselves stuffed and the turkey deflated, most of us would have been marking out an armchair in which to recuperate, but Mr Greene, as befits a writer, has the discipline to maintain niertness when guards are down. One wonders whether he set about writing at once or merely made a note for later. Which ever it was, out came the novel.

It could be read in less time than BBC2's film version took to show it last night, and with more reward. There is nothing revelatory about the predilection of men, and rich men in particular, to greed, but Mr Greene's craftsmanship compels admiration even when one feels it lacks an appropriate challenge. One extends to such an author a friendly nod for his whole work. The film, produced by Richard Broke, who wrote the screenplay, and directed by Michael Lindsay-Hogg, had to succeed of itself. It failed.

Overlooking the omission of Greene's ending, which has Dr Fischer shooting himself, Messrs Broke and Lindsay-Hogg were only at fault in that they felt they had to try. What they had was a story that fell short of surrealism and lacked credibility as fiction. They also had a talented cast constrained by their roles.

James Mason played his last part as the self-despising Dr Fischer pursuing his theory that there are no limits to what the rich will endure to become richer. Clarissa Kaye. Hugh Burden, David de Keyser. Jacques Herlin and Barry Humphries were the "toads" who sat at his table suffering humiliation for the present at the end of it. Alan Bates was Jones, Fischer's poor son-in-law who represents a challenge to his belief, and Greta Scacchi was Fischer's daughter.

The attractiveness of this last was something of a relief amidst the general morbidity but, alas, she had to die in a skiing accident. Even Cyril Cusack, who can usually do the best with the least, seemed in irons

Mr Greene, known to be rucful about most attempts to film his works, is said to have been optimstic about this one. Perhaps he misjudged the extent to which an audience might share his enthusiasm for the pursuit of spiritual weevils.

On ITV. Yorkshire's The Glory Boys, written by Gerald Seymour and starring Rod Steiger and Anthony Perkins. began its three-night passage with such urgent address that it would be unjust to review it braefly. I shall report from the terrorist from later.

Spiritual Opening doors to the unconscious

The Print in Germany 1880-1933 British Museum

Dada-**Constructivism** Annely Juda

Being blase about the British Museum is so easy it has almost become a national sport. And yet the place just will not settle represented with woodcuts, down quietly to letting us take it etchings and lithographs showfor granted. Virtually any time ing its-range of subject-matter we choose to make the pilgrim— (from the idyllic to the nightmaage to the top of the stairs by the North Entrance, where the of stylistic elements (from Department of Prints and primitive art to the most Drawings has its exhibition sophisticated Art Nouveau) eallery revelations of some sort which went into the crucible of gallery; revelations of some sort await us. It may be the most the Expressionist sensibility and incredible show of Old Master came out transformed. Needless drawings, or mind-boggling perhaps to say in Beckmann tributes to artists like Raphael year, this separate but related tributes to artists like Raphael or Watteau due for anniversary displayed with a large section of nearly complete display of Goya graphics one could ever wish to see. And - here is the clincher in each case largely or entirely drawn from stock. It is as if the British Museum (with some occasional augmentation from the British Library) need only be aimed in any given direction. reach into its files, and bring out a show which anywhere else would be the wonder of the age.

The new show The Print in Germany 1880-1933 (until January 6) is a case in point. Since the BM is the national repository for prints and draw-ings, its collecting brief includes many-much more up-to-date things than Hollar or Michelangelo - things of which the painted equivalent would automatically go to the Tate. We forget that until confronted with a show of this quality, all of which comes from the museum's own collections except for the section of illustrated-books from the British Library The first wonder is that the documentation of the "Age of Expressionism" is so comprehensive. We start with that eccentric master of etched fantasy, Max Klinger, and the weird series of prints through which, in 1881, he chronicled the history of A Glove and incidentally created at once the typical surrealist atmosphere of emotional disclocation, the feeling that something not quite right is going on under the

The point of this as an origin of German Expressionism is that Klinger has opened a door to the unconscious to the depiction of emotional truth, depiction of emotional truth, look round this show without at however disruptive, rather than least an occasional shudder, a literal representation. And inthe next few years, with astonishing speed, we see very square. Establishment artists like Max Liebermann being infected so that what should be quite ordinary rural scenes take. on a menacing and not wholly explicable intensity. Lovis Corinth carries carries it all several stages further, and we Dennis Hackett | are ready for such extraordinary.

pparently normal surface of

with her anguished social concerns, or the Norwegian Edvard Munch, who sneaks in on the basis of his deep on the basis of his deep involvement with German art during the crucial years at the turn of the century. And so lot the classic generation of fully-fiedged Expressionists, most of whom were born in the early 1880s; Marc in 1880, Marke and Heckel in 1883, Schmidt-Rottluff in 1884, Kokoschke in Rouluff in 1384, Kokoschka in 1886 and so on.

This group is most admirably which went into the crucible of It is not always clear at any

given time what things belong with what, and during the 1920s the savagely ironic realists of the Neue Sachlichkeit group, such as Dix. Grosz and Hubbuch (this last one of the great rediscoveries of recent years), generally believed that they were at the opposite pole from the decadent Expressionists, who represented the last throes of the Romantic Agony. Now we can see - and it is one of the great benefits of a show like this that it makes us see with unusual clarity - that the most important thing, binding them all together, was the spirit of the age. Not only is it impossible to assign an inde-pendent such as Kollwitz to one group or the other, since she clearly partakes of both, but clearly partakes of both, but even the extreme subjectives of Expressionism, and those who made a good of the new objectively to be following slightly different routes to the same

even the sustaining sonorities of the woodwind. It was rather like the lemon juice without the paneake: sharp, sour and insub-stantial, with its tiny, tight vibrato and its accrbic rhythmic insistence, Schubert's Andante, in his Fifth Symphony, was rather less happy than Mozart's. Here Münchinger's tendency to hold back tempi ingrattatingly at this stage in the proceedings was taken to almost ludicrous extremes, as each phrase was wound down only to be started up time and again,

These were hardly the most auspictous circumstances for young Adelina Oprean's Mozari Violin Concerto No 5 in A. She is a highly strung player at the best of times; with only the most brittle of support, it was a case of dancing on broken glass. Sectional speed changes grew more edgy, more ragged, as the work progressed, and even the most well-meaning of ideas were hazarded against increasingly uncertain ensemble.

Dance

Turning 'Sacre' into standard repertory the huge copulative finale, there feel of contemporary life into is not a moment when the dance.

Béjart Gala TRM. Brussels

Sometime within the next 16 years, Maurice Bejart will need to find a new name for his company, because by 2001 the title Ballet of the 20th Century will be out of date. If that sounds too long-term a speculation, remember that it is already a quarter of a century since it all began in Brussels, and I doubt that many people then (even Béjart) would have given much for its prospects of surviving this far and, in the process, becoming one of the world's most travelled and most influential dance troupes.

The company, as a formal entity, began only in 1960, but the foundation was laid the previous autumn when Bejart's small group was one of four avant-garde dance companies invited by Maurice Huisman, newly appointed director of the Theatre Royal de la Monnaie. to perform there as part of his policy of trying to attract given less to do, our time beat younger audiences into what them have always been very had been a staid and dusty good indeed.

On this occasion Chikahisa adjectives any longer once Bejart on Huisman's com-mission, had created his version of Le Sacre du printemps for-dancers of the combined

Inevitably Sacre had to be the cornerstone of the galas (four of them on successive nights, all sold out) that have just opened the jubilee season in Brussels. It has been, Béjart told me, 'the only work we never had to revive because it was never out

tension slackens. Bejart's strength has always lain chiefly in his choreography for men, and with dancers such as Patrice Touron as the chosen one, violently tormented, and Michel Gascard as the leader of the young men (the role Béjart danced when Sacre came to Sadler's Wells in 1960), the sucession is in good hands:

Men were in the forefront in several other pieces representa-tive of Béjart's work over the years. Jorge Donn made lucid the movements and, so far as anyone could, the metaphysics of a solo Le Voyage (1960) inspired by the Tibetan Book of the Dead. Richard Cragun, a guest star from Stuttgart, led the ensemble in a long energetic sequence from Messe pur le temps présent (1967).

But you could never write off the women in Beiart's company. They are (uniquely among the world's big ballet companies) fewer in number and generally

Natsuyama, through the innocent, joyous clarity of her dancing outshone her able fellow guest from Tokyo, Masake Todo, in Dichterliebe (1978). This is a curious duet to music mingling Nino Rota's cheerful - circus tunes with Schumann, and shows a clown inspired by love of a young dancer to cast off his modey and follow true art even though he sees her as conventional.

only work we never had to revive because it was never out of the repertory for a single season." That must represent many hundred performances, but the company still dance it with no trace of routine.

From the opening with 22 men spread across the stage, crouched like animals, through their sames to choose the done with modern music. their games to choose the be done with modern music, victim, through the apprehen- and no more decor than a rope

Like almost anything that was once ultra-modern, it has come to look dated. But, by presenting it scrupulously as a period piece, Béjart makes it work still. Dupond looks much like Bejart did then, and dances with his usual flamboyant presence, but while Mirk was on stage, transformed by a fringe, a red gash of a mouth and an all-

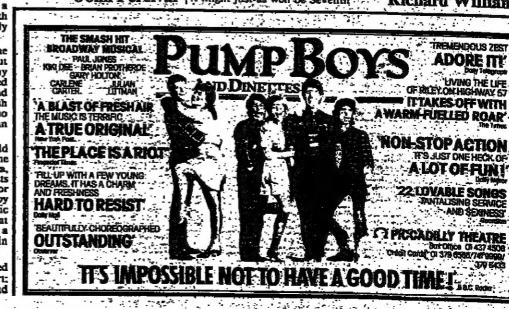

black costume into a Fifties femme fatale. I for one could not take my eyes off her. To end the evening Bejart presented the European pre-mière of a work that he produced four years ago in Rio de Janeiro: a danced and partly spoken version of Ionesco's play The Chairs: He himself performed in the original production with one of his former leading dancer leading dancer. former leading dancers, Laura Proenca. For the new pro-

duction, since he is still recovering from a hip oper-ation, Béjart asked John Neumeier from Hamburg to partner Marcia Haydee from Stuttgart --probably the first time a choreographer has worked with a guest cast consisting entirely of ballet directors. The two performers share the

stage with what must be about four dozen chairs; and as many again hang ovehead, massed like threatening clouds and finally descending as if to crush these aging adolescents who imagine they might be Tristan and Isolde

The music, as you would guess from that allusion in the text, is from Wagner's opera, but only orchestral fragments which are at times overlaid or interrupted by speech or by silence. The first time the music stops, at the height of a great emotional climax, comes as a shock like cold water thrown in

SPECTRUM

A poll taken specially for The Fimes found that most people favoured a youth volunteer service. In Part 2 of the analysis, Colin Hughes examines the options

Youth will be served - by helping others

concerned that unemployment should no longer exist under the age of 18." Beneath those sparse, apparently simple words, expressing a seemingly noble wish, lies a

furious turnoil of debate.

For the comment was made. enigmatically, in reply to a question about whether or not the Government is ready to consider introducing a national scheme of community

service for all young people, perhaps with a military option.

The opinion poll, carried out exclusively by Market and Opinion Research International (Mori) for The Times and published yesterday, showed that opinion is divided on. whether such a scheme should be

compulsory or voluntary.
All the organizations promoting the idea of a British "all-in" Peace Corps for youth are adamant that it must be voluntary and must exclude must be voluntary and must exclude have been deprived on any military options. They believe tunity to contribute that any hint of coercion will turn. The result was that when the young people off and emphasize that SDP's "think tank" the Tawney there is a flat contradiction between Society produced its own Peace the notion of willing service to the community and compulsion.

On the last occasion the issue arose in Cabinet rooms, during the planning of the Youth Training Scheme, ministers concluded that even indirect "incentives", such as withdrawing supplementary benefit from teenagers who rejected more than three offers of a YTS place. would be politically unacceptable in Britain today.

Even a voluntary option which aimed to pull all young people into the community service net could, according to some estimates, cost more than £1,000m, which might

'The scheme must not befutile makework, that would be a recipe for disillusioning an already frustrated youth'

He continued Wa are in denor

He continued: We are in danger of losing a whole generation of people, turned off from the society in which they five because they have been deprived of the opportunity to contribute.

Corps proposals last month, they placed as much emphasis on what the scheme should not be as on its

positive merits.

Some 20 youth organizations, including the National Youth Bureau. Youth Aid, and the National Council for Voluntary Organizations, banded together four years ago in a loose alliance called Youth Choice precisely to light. Youth Choice precisely to light: plans that they suspect would lead to enforced youth service.

Mr Paul Lewis, director of Youth Aid, believes that Youth Call's plans are merely a way to "distract and disarm, a government tool for using cheap labour, depriving youth of skills, and weakening trade union influence. It would cost at least £1,000m to set up such a national scheme. Why not spend that money on creating real jobs, with real training?" he asks.

To which Mr Kim Taylor, director of the philanthropic Gulbenkian Foundation and a leading advocate of national community service, responds: "Of course volunteering is cheap labour. But some essential tasks won't get

done any other way."

As one of the first headmasters to start the now widespread practice of sending his Sevenoaks school pupils out of the classroom into the community 25 years ago, Mr Taylor is convinced that voluntary work can provide educational value which no trainee supervisor could achieve. 'All the evidence now suggests

that employers are looking, not for that employers are looking, not for specific skills which may be rounded to run such a scheme would leave it to round the ground.

They argue that such a scheme would leave it to round the many on the left back the idea, their suspicions run deep.

Tomorrow

Voluntary service now and models for the future

Graham Greene has always disliked being interviewed or man, reappearing. "Il est à going on television, and when I went to his small Antibes Amis, je crois." flat on the occasion of his cightieth birthday it was no exception. He refused to see smote me, though without drawing blood. There was,

That, perhaps, is putting it too bluntly. The fact is that I had no interview arranged with Mr Greene and I also went to the wrong flat. I did not quite know what to expect when I came face to face with Mr Greene for the first time, but I certainly did not expect a florid, moustachiced man in his forties and a string vest.

"M Greene? Oh là là toujours la presse pour Mi I have always felt it rather Greene," he grumbled. "Il ironic that Graham Greene faut que je déménage. Il should become immensely habite à coté," This last successful through writing accompanied by a gesture at about people who were a nearby flat. I rang there anything but - in fact, this Fiche-moi la paix." And the

"Il n'est pas là," said the Paris. Interview avec Martin

after all, something rather Greeneish about going to the wrong town to interview him and I felt like one of his characters, conscious of failare but not yet without hope. And if Mr Greene really disliked interviews, was I not being of more use to him by not interviewing him than Martin Amis, who was inflicting something pleasant on him?

was one of the questions I

Enough to make me Greene with envy

moreover ... Miles Kington

had prepared to ask him. I neighbour had any views on this. It might be something to The Observer." of a scoop to interview a neighbour of Greene's.

Before I could make up my mind, a young man in shabby clothes appeared at my side. The young man turned out and rang the Frenchman's to be a freelance water for a bell. He reappeared, still in the string vest.

"Um, excusez-moi, je cherche Monsieur Greene," said the young man. It was as far as he got.

door was closed again.

"He's not there." I transwondered if his French lated to the bemused young man. "He's in Paris, talking

> "Oh, hell. I was rather gambling on getting a bit of a scoop there."

railway magazine, hoping to interview Greene about his experiences on trains, and what they had meant to his writing. He felt that the unusualness of the approach would stir Greene's attention, though I doubted it. "In his long life," I said.

"there can't be any questions he hasn't been asked." I wager there is some earnest American student doing a D
Phil on the place of rail
transport in the occurre of Graham Greene."

"I bet The Observer is doing that at this very moment." said the young man dolefully.

Curious word, doleful. It looks as if it should mean in an unemployed sort of way. That was certainly how the young man appeared. His anorak seams had started to split and you could not tell what colour his shoes had once been. Although young, he already looked drab and seedy ...

Seedy! The one word I had Graham Greene. Everyone feeling that he had created a man brought it off.

world of seediness and dingy hotels, whereas he claimed only to describe what he saw around him. It suddenly occurred to me that everyone knew pretty much what Graham Greene thought about everything, and I felt a lot better about not talking to him. "So how are you going to get round not meeting him?" said the young man.

"I am going to write about an interesting failure to interview Graham Greene," I said with dignity, and left him standing there. As I went out into the street, I almost knocked over an old man shuffling in. He looked vagpely familiar,

It was only at Heathrow that it clicked. I had almost resolved not to use to knocked over: Graham Greene. I have now placed an knew how much he hated the order for a certain railway. idea of Greeneland, the magazine to see if the young

On the left, the existing cheque card. On the right, the new-look cheque card.

The existing card was introduced 15 years ago. While it has made cheque card fraud difficult, criminals have become more determined and ingenious. With the result that, in 1983, cheque card fraud losses ran to over £20,000,000.

The new-look card, however, can't be copied or changed without showing obvious signs of alteration.

To make it even more difficult for the criminal, the new card has an ingenious hologram in the lower right-hand corner. (You can look 'into' it and see the words 'Bank Card,' a symbol matching the one in the top right-hand corner of the card, and the figure '£50'.)

So, with a little help from you, life is going to become very difficult for criminals.

What does the retailer need to know?

The card works in much the same way as the existing card (the Conditions of Use are set out on the back). Of course, it is still up to retail staff to check the details of the card and the cheque before carrying out a transaction. The retailer's vigilance in checking the details of the card against the cheque itself – particularly the signature – will be crucial to the success of the new card in checking fraud.

Incidentally, a £50 reward is normally paid for the recovery of a defaced, altered or forged cheque card.

The Banks have already sent a package with details of the new card and full instructions to over 3/4 million retail outlets. Retailers who haven't received theirs yet should contact us at the address below, or enquire at their bank.

What about the old card?

The new card is in circulation as from October 1st, but it will take some time before every cheque card holder is issued with one. So in the meantime, provided they are still valid, all current cheque cards should be accepted until they are replaced during 1985.

Card holders need take no action themselves; they will receive the new card automatically from their own banks before their current card expires.

And the future?

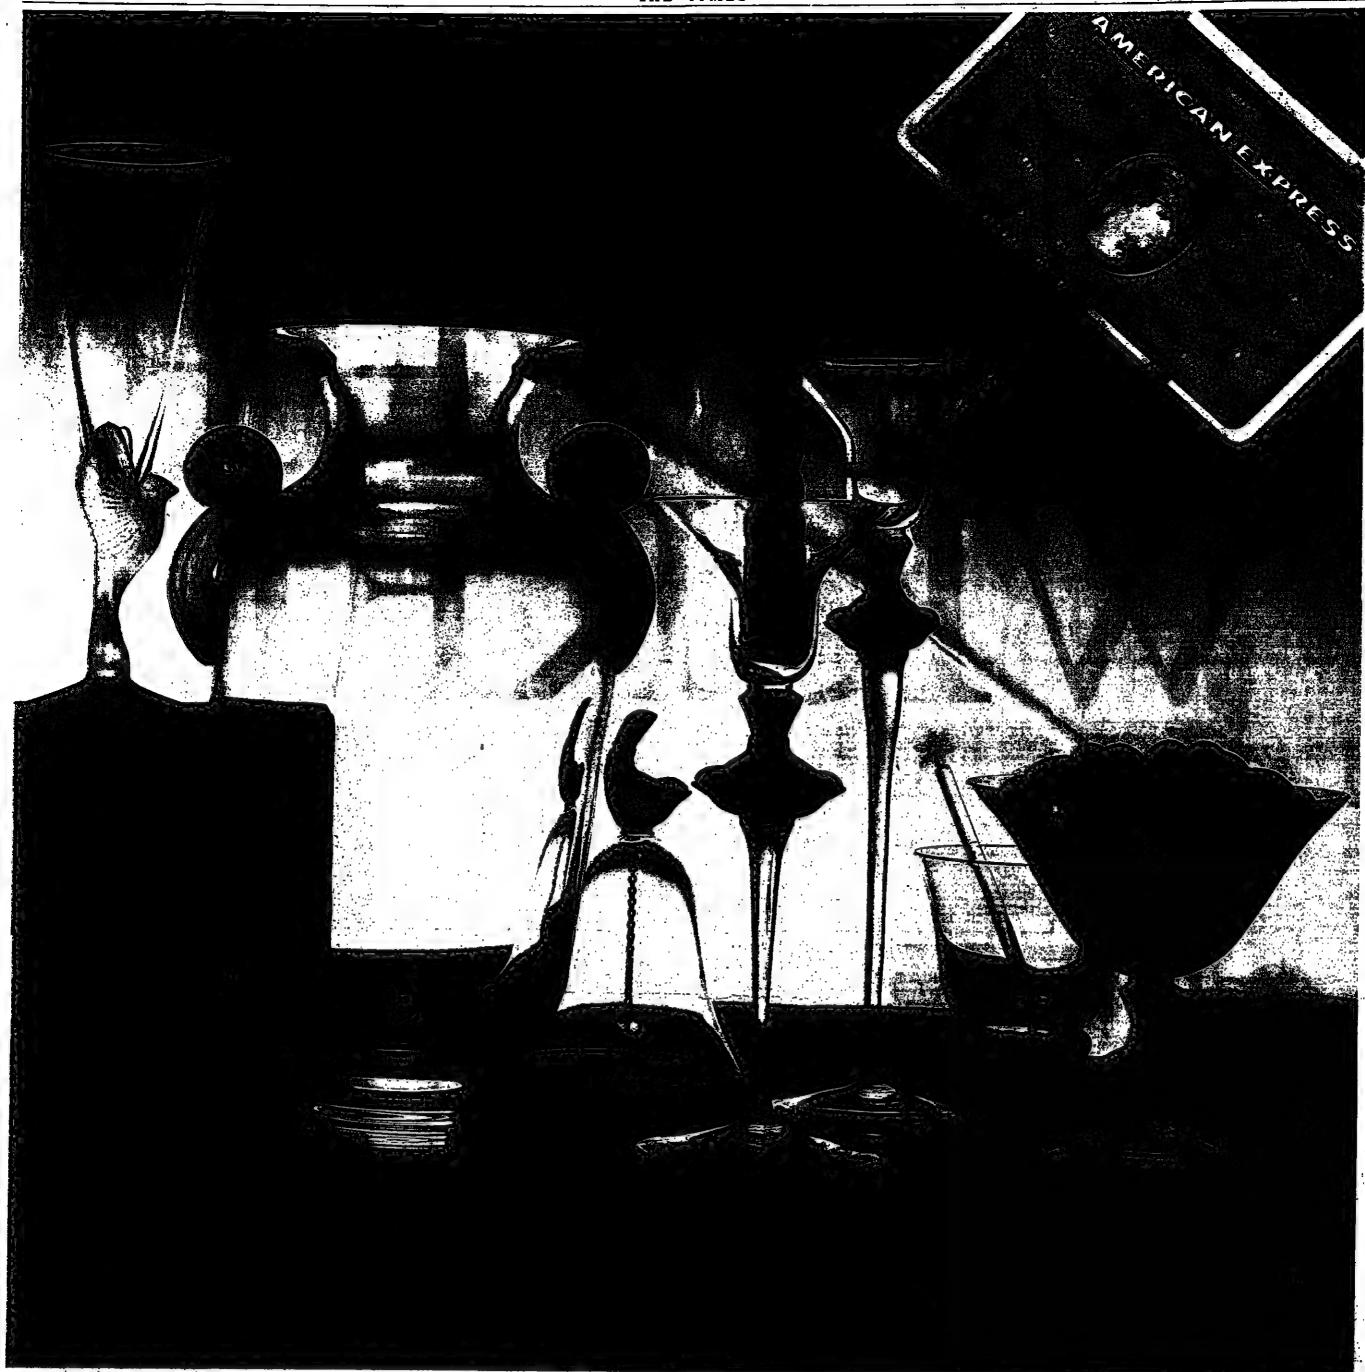

With this new card, the co-operation of card holders, and continued vigilance from retail staff, we can make life so difficult for the criminal that cheque card fraud just won't pay.

Good news for all of us.
Bad news for the villain.

THE TIMES DIARY

Swinging Blackpool

The Labour conference, condemning police violence on the picket lines yesterday, omitted to mention violence in the loyer of Blackpool's violence in the loyer of Blackpool's Imperial Hotel on Sunday night. Brian Wilson, a' member of the Scottish Labour party's national executive, spotted Anthony Looch, the Daily Telegraph's parliamentary correspondent diligently checking a PA report that the Kinnocks had failed to sing the national authoris. failed to sing the national anthem in church that morning. Wilson accosted Looch, accused him of being a muckracker and "prostitute of the press," and threw a glass of whisky in his face. The normally mild mannered Looch lashed out, breaking Wilson's spectacles. The two were finally parted by the Imperial's management. "I don't regret clout-ing him," said Looch vesterday. "I wish I had hit him harder."

• Is nothing sacred? The Black-pool rock on sale at the Winter Gardens is ron through with the words "Tories Out".

Frown Imperial

While the bulk of Labour's 29-strong executive committee recline at the party's expense in the imperial Hotel, (double rooms £56). Denis Skinner, MP for Bolsover, is paying £10 a night - out of his own pocket - in a B and B. Skinner, who finds the idea of his NEC colleagues staying at the Imperial "abhorrent" and "elitist", can ill afford this principled stand. For the past seven months his MP's salary has been paid direct to the NUM and the families of striking miners.

Robert Maxwell appeared to have one supporter amid a roomful of becklers when be addressed a Blackpool fringe meeting on Sunday woman who applauded all he said. Intrigued, left-wing Hackney MP Brian Sedgemore questioned her and discovered she was the wife of Labour's right-wing chief whip, Michael Cocks.

Flying high

The power of the press. Yesterday the diary reproduced Walter Crane's historic electricians' union banner; which had been barred from Blackpool because Labour conference organizers thought that, by hanging it, the party would be endorsing the "right-wing" led EPTU. Today the banner is in Blackpool. Terry McCarthy, director of the National Museum of Labour History, which had agreed to lend it, tells me that when party leaders heard of my inquiries, emergency instructions - believed to have conte from Neil Kinnock himself - were given, ordering the banner to be taken immediately to Blackpool, "in a panda car if necessary." It was put in a hired wan and driven overnight from London by the museum's curator. Bernadette Gillow, "Absurd is not the word," said McCarthy

The NUM's Switch on at Six campaign urging the use of off-peak electricity to deplete power station coal stocks, now asks supporters to flush lavatories after 6pm: This helps to activate sewerage pumps which are high users of electricity." • Former Scotland Yard com-

mander Albert Wickstead, known in his heyday as the Grey Fox because of his cunning, could be facing his toughest case yet. Now security chief at the Sun, he is investigating the disappearance of a pile of photographs of topless models to be used in the next Sun calendar. "Where do you start?" he asked me.

Double vision

Spectator subscribers received an unsolicited mailshot yesterday from Alexander Chancellor, the magazine's former editor, inviting them to subscribe to the revamped Time und Tide. which he now edits. Readers who, like myself, object to the intrusion of mailshots, will doubtless speculate how Chancellor got his hands on the Spectator's subscription list. Could the answer lie in Time and Tide's telegraphic address: Watergate, London? Far from it. The Spectator, spld the addresses of its readers to Chancelles for 5250. lor for £250. And what does Chancellor do? He promises in the mailshot that his new baby will deal at greater depth with a wider range of subjects than is normally possible in the Spectator." And his writers? Principally old Spectator retainers - Ferdy Mount, Richard Ingrams, Auberon Waugh, Paul Johnson et al.

Belgrano: there was no alternative

The Belgrano controversy drags on, wearying the great majority who have long understood the military imperative that convinced respon-sible ministers that HMS Conqueror should be authorized to attack. It is difficult to believe that the motives. of those who still doubt the relative unimportance of the Belgano's course at any particular time are other than political, but it might help them clear their minds if some of the professional aspects were spelt out in more detail,

A commanding officer making contact with the enemy reports to his operational commander in the traditional form, "What, where, whither, when", "Whither" is an estimation of the enemy's present course and speed. It is no sure indication of his future movement. : All that can be said with certainty when the signal is received after a variable delay-is that the enemy must be within a circle whose centre is the reported position (where) and whose radius is the enemy's known maximum speed (30 knots in the case of the Belgrano) multiplied by the time that has elapsed since

This circle is called the "furtheston circle" and it expands as time passes. The sensible operational commander, which Admiral Wood-ward certainly was, must take account of the most dangerous possibility, that the enemy could be at the point on the circumference of the circle nearest to him.

Let me ask the doubters to put themselves in the position of the War Cabinet on Sunday, May 2, 1982, in possession of all the intelligence that is summarized in paragraphs I to 8 of the annex to the Prime Minister's letter of September 19 to Mr George Foulkes MPs (report September 20), but with none of the information now

minds are the air attacks on our ships the previous day, the reported detection and attack on an Argentine submarine close to the task force, and knowledge that virtually all the Argentine ficet is at sea. They are aware of the intelligence appreciation that the Argentines are attempting a pincer movement on the task force.

They have been briefed on the limitations of communicating with submarines deep in the South Atlantic, The Chief of Defence Staff rive details of HMS Conqueror's report that she is in contact with the Belgrano and asks for political approval to attack. This is given.

Would the doubters have wished to apply a caveat to the decision? If so, what? "Do not attack if she is steaming west?" But the Belgrano and her consorts remain a threat as long as they are affoat and undamaged. Course and speed can be changed in minutes. They may split and go in different directions.

That HMS Conqueror will remain in
contact cannot be guaranteed.

Communication between the submarine and Northwood is far from immediate: In war, opportunities must be taken while they exist; there may not be a second chance.
At 3.40 pm on May 2. Northwood

received an amplifying report from HMS Conqueror, still in touch with the Belgrano and her escorts. The position, gave a new datum for furthest-on circles, this, together with course and speed, gave an none of the information now indication that the Argentine ships available with hindsight. were moving relatively slowly Particularly fresh in ministers, westward. None of this was reported. to ministers, in my view correctly.

But, suppose this latest infor-mation had been reported, what action would the doubters expect the ministers to take? Cancel the previous approval to attack? There is no new intelligence of Argentine intentions on which to base a reappreciation. At 30 knots, the

Lord Lewin, Chief of the Defence Staff during the Falklands war, puts the military case for sinking the Argentine cruiser and argues that all subsequent evidence has shown the Cabinet decision was right

during the night, Recently refuelled. she might be preparing to pass south of the task force to attack our recently reestablished small garrison in South Georgia, protected by a single frigate.

Admiral Woodward had onnaissance aircraft to warn him of the Belgrano's approach other than anti-submarine helicopters, busy against another very real threat. He had no direct communi-cation with HMS Conqueror and

was feeling somewhat exposed.

To carry the hypothesis further: suppose ministers, against strong military advice, did decide to withdraw approval to attack. They would have been reminded that the signal reversing the order could take some hours to reach HMS Conque-ror (we know now that the original signal took more than four hours from decision to reception). Since, when the permission to attack was received, the commanding officer of HMS Conqueror would immediately start the tastical monocurres for his approach to a firing position - these would be incompatible with exposing an aerial to receive further signals - it would be virtually certain that the attack would be completed before the cancellation order was

received. -We now have much more information about Argentine actions and intentions on May 1 and 2 than were then available. From Admiral Lombardo's appearance on Panorama on April 16 we know that the Argentine fleet had been ordered to attack the task force and that

attack was indeed correct We also know from Admiral Lombardo that Super Etendard aircraft, armed with Exocet missiles, had taken off from shore bases on May I, but that the attack failed May I, but that the attack failed because the necessary in-flight fuelling was unsuccessful. We know that, because tack of wind prevented the launching of the Skyhawk aircraft from the Argentine carrier, the warships were called back; Captain Bonzo of the Belgrano tells and the back to be a selected to a selected to a selected to a selected back; us that he had been ordered to a waiting position and was conducting "anti-submarine tactics" on put in presumably because he thought he might be attacked.

Against this must be set the present knowledge that the Peruvian president was putting forward what, in the light of the detailed formulae that had been exchanged and dismissed in the Haig shuttle, can only be described as tentative proposals for further negotiations. There has been no suggestion that the Argentine command rescinded the orders for their own ships and submarines to attack because this initiative was in progress - and they certainly knew about it while we did not. They do not appear to have been concerned about the effect the torpedoing of a British warship by an Argentine submarine on May 2 might have had on the British

attitude to negotiations.

If all this had been known by ministers at the time, surely it could only have reinforced their resolve that, for the better safety of our own people, the opportunity to remove the Belgrano from the Argentine order of battle should be taken. That the Belgrano should be sunk with such heavy loss of life is indeed tragic, but the responsibility lies squarely with the junta which launched the invasion of the Falklands, and which when called upon by the United Nations to withdraw, poured in reinforcements demonstrating that what it had it intended to hold. These men are now under trial in Argentina for crimes against their own people. Which of our politicians would have been prepared to take the risk that the Falkland islanders should be left

under their administration?

Belgrano could still reach our ships -Admiral Woodward's assessment

James Curran challenges Labour's 'broad front' advisers

Why Kinnock must take a chance

Neil Kinnock has stragged off the latest adverse Gating Poll findings revealing a sharp drop in history personal standings as well as line as support for the Labour Party - is the latest being merely a transfert blip in the ratings caused by the miners strike.

While this may be correct, the downturn in the polls should prompt him to think again about the ... broad campaigning strategy he has

adopted.

His defensive approach has been crucially influenced by the writings of Eric Hobsbawm, to which he frequently refers both in private and public Hoosbawn a disleading member of the British Communist Party, has argued in a number of influential speeches and articles that the Labour Party needs to adopt a new approach if it is to reverse its 30 years of almost continuous electoral decline. labour's crisis, he argues, is rooted. in the decline of its manual working class base, increasing consumer individualism and the growing sectionalism of trade unions. The Labour Party, in his view, must learn to sing a new tune if it is to-renew its electoral appeal. Instead of its traditional emphasis on class? politics, it should seek to build a popular front attracting a broad spectrum of opinion and even be willing, if necessary, to form a pact with the Alliance at the next election.

While Neil Kinnock-has firmly. rejected an electoral deal with the Alliance, he broadly accepts the thinking that leads up to it. His principal aim as leader has been to rebuild the Labour Prty as a people's party with a broad cross-sectional, appeal. This partly explains his anxiety to distance himself from Arthur Scargill. It also accounts for the constant reiteration of two themes in his speeches during hisfirst year as leader - the Government's failure to reduce unemployment and its attack on long-estab-lished freedoms. It has been his bad luck that the divisive miners' strike has partly drowned out his attacks on the Government, and cut across his aim of mobilizing a "broad

democratic alliance" against it. But it has not only been bad luck that has tripped Kinnock in his first year. The analysis that informs his strategic thinking is also flawed.

But while there is clearly some validity in Hobsbawm's analysis, its bleak pessimism is encouraging Labour's new leadership to be overcautious. Hobsbawm's central argument that Labour is in decline due to deep-seated social change cannot

Give us the tools, said Chuchill, and we will finish the job. But the work of *Taths* is unlikely ever to be done. The Tool and Trades History Society, barely a year old, has set out

to provide "a forum in which the

tools, the techniques and the social circumstances of pre-industrial tech-

nology can be recorded and investi-

This curiously appealing lot seem

they are, they seem never to have coalesced into a single, organic field

be readily reconciled with what has happened elsewhere. During the period when electoral support for the British Labour Party was nose diving, the left romped home with more than 50 per cent of the vote in Austria (1979), Finland (1966), France (1981), Greece (1981), Portugal (1976), Spain (1982) Sweden (1982) and Norway (1969), and secured its highest over vote in West Germany (1972), and Italy (1983). Although many of these countries had experienced similar social changes to those in Britain. this did not prevent all but two from winning a higher percentage of the vote than the British Labour Party achieved even in 1945. .

As a number of contributors point out in a new book (to which Neil Kinnock contributes two essays) Hobsbawm highlights only those social changes that have operated against the left and largely ignores countervailing social trends. The decline of social deference, increasing resistance among women and young people to patriarchal auth-ority, the effects of unemployment in driving women back into the home and blocking opportunities for school leavers, the unionization of white collar and white bloused workers, the sharpening division tween workers in routine jobs and the "career class", and the enormous growth of public sector employment are only some of the social changes which have aided the left in much of Europe and which potentially could aid the left in Britain.

The Labour Party is not in a position of deep crisis, undermined by remorseless social processes to which it can respond only by inching cautiously and inoffensively into the middle ground of British politics. On the contrary, there are powerful social currents which make it possible for an unashamedly socialist party, responsive to these trends, to forge ahead.

Kinnock's leadership has already laid the basis for Labour's recovery. When he took over, the anti-Conservative vote had just been split 26/28 per cent in the general election and commentators were writing off, with seeming justification, the Labour Party's future prospects. Now that Labour has closed much of the gap between it and the arty. La bility as the principal opposition

party has been restored. This stems in part, from Neil Kinnock's sure touch as a party tactician. The reselection of MPs is potentially an issue which could tear the Labour Party apart, as it did under Michael Foot's leadership. Yet the contrast between the two leaders' handling of the issue could not be more different.

Kinnock, on the other hand, has wrong-footed and divided the left in the constituencies by urging a voluntary extension of the franchise in the reselection of MPs. He has offered a helping hand to right-wing MPs without becoming their unpopular champion.

But a strategy based on reconciling internal party divisions and identifying the common denominator of anti-Thatcher opposition in the country is unfortunately not enough. Many opponents of Government remain highly sceptical about the ability of a future Labour government headed by Kinnock to do any better in reducing unemploy-ment and suspect that it would do much worse in handling inflation. Heading a more united party in-attacks on the Conservative administration produces, in these circumstances, only a limited elec-

toral response.

Neil Kinnock needs to be as much concerned, in his second year as leader, with developing and presenting Labour's economic policies as in attacking the Government. His first move should be to deliver a series of keynote speeches in which he sets out in detail how a future government would set about modernizing the British economy. Only passionate and persuasive advocacy of a radical alternative, sustained over a number of years, can help to dispel the current cynicism which, more than public reaction to picket line violence, stands in the way of

Labour's recovery. C Times Newspapers Limited, 1984

and misogyny, is quoted in Middle English: the story of the woman who Hand it to them

Small Worlds: an occasional series on unlikely magazines

of study. Yet the public interest in the practical, workday details of our past has never been greater. Some of the most rapidly growing areas of historical activity inescapably in-volve the traditional manual trades and their associated tools but these only appear on the periphery of the main focus of interest".
In short, concludes Philip Walker

Take, for example, Dr Jane Geddes's splendid 23-page contri-bution on "The Blacksmith's Life,

annual journal, and the newsletter, look good and perform their appointed functions smoothly, just like the old artefacts and artificers the chairman, "the universal and primordial nature of the basic trades and their tools has gone largely unrecognized". In my experience, anything that attracts the word whose shades grace their pages. "These subjects are not new", the "primordial" is unlikely to be totally. devoid of interest, and this extra-ordinary collection is no exception magazine says." In a piecemeal waythey have attracted attention over a long period and in many different contexts but, inter-related though to the rule.

Wife and Work 1250-1450". Unpromising? Hardly: Aelfric, Alberic, Vulcan and Wayland the giant make appearances in the very first paragraph.

Dr Geddes is on the trail of the hitherto underestimated role of the female blacksmith" among other things. Far from being exceptional "it was taken so much for granted that a smith's wife and daughters would assist him that special concessions had to be made for a achelor". The founders' guild is. known to have issued a special regulation allowing a smith in York to hire one extra apprentice because he lacked "the usual female assist-

forged the nails for the Crucifixion.

Dr Geddes could obviously write a book about her subject, and I somehow suspect she will. The other pieces in the journal seem a touch anti-climatic after such a vigorous effort, but no less diligent in their approach. Early English screw-stem ploughs, a turn-of-the-century Irish woodturner, the tools of a cooper in woodturner, the tools or a cooper in seventeenth-century Quebec, make their stately appearances. Each article is illustrated with paintings, drawings or photographs ranging from the enchanting to the bizarre.

The newsletter is inevitably less formal, more chatty. Membership

was more than 500 in April 1983. Tony Samstag Tools & Trades, the Journal of the Tool and Trades History Society, vol I. Taths, Winston Grange, Stowmarket, Suffolk IP14 6LE, £5 Taths Newsletter no. 5, £1.50. **Roger Scruton**

The Pope musters his divisions

Set against the background of world events, the Pope's denunciation of "liberation theology" may seem unimportant - as unimportant as the Bishop of Durham's carefully starpuranced appetracies of Dean the Bishop of Durham's carefully stage managed apostasies, or Dean Cupit's tub-thumping repudiation of his faith. In fact, however, the Pope's gesture is one of the most significant developments in the Christian Church since the second Vatican Council.

For the first time in recent years a Christian leader has recognized what has been obvious to unbelievers for decades: that Marxism is a religion. decades that Markism is a religion, and that it is as incompatible with Christian thought and practice as is the religion of Khomeini or the worship of the sun. Moreover, Markism is a primitive religion, unable to distance itself from the busy nothingness of this world, unable to introduce either clarity or serenity into the minds of those converted to it, and unable to offer the supreme consoling vision of a transcendental God, It is a religion of turnoil, hatred and blind superstition, clothing the world in violence, and feeding upon human

Where the Marxist sees "liber-stion", the Christian sees only murder, terror, and self-justifying sin, Poverty, hunger - even death itself - all these features of the human condition which true religion fortifies us to accept, are, for the Marxist, occasions of demonic outrage. His god History roams the world in search of abstract justice, and where History alights the blood of the innocent must flow. His church is the most bigoted that the world has known, and his inquisition the most murderous and implacable, tolerating no govern-ment except Marxist theocracy, and extinguishing opposition at what-

Like every primitive religion. Marxism is baunted by imaginary devils. "Capitalism", "imperialism", "deviationism", "revisionism", "lnfantile leftism", "fascism". everywhere in the path of the Marxist lie dark and inscrutable enemies, and without the benefit of constant incantation, he must surely be waylaid by them and deprived of his soul. Those in the grip of this superstition must therefore con-stantly fortify themselves with the most astonishing invective. The "word magic" of the Marxist is an attempt to "appropriate nature", to summon the forces of History against the enemy. When he calls you a "bourgeois, fascist, McCarthyte cold-warrior" he gives vent to a superstitious fear of your disagreement, and like every person in the grip of superstitious terror, he is dangerous. It was just such a terror that once prompted Khrushchev to leap on to the rostrum of the United Nations and cry "We will bury you!" This was neither a prediction, nor a decision. It was a spell, ...

The normal practice of the Roman Catholic Church on encountering a primitive religion has been to incorporate it to elevate its rites into sacraments, its gods into saints. into sacraments, its gods into saints, and its joys and terrors into moral sentiments. But certain special features of Marxism make it resistant to this process. First there is the theory, which effectively reverses the dogmas of Christian theology. Marxism offers immutable laws of History in place of the Will laws of History in place of the Will of God, earthly communism in place of heavenly salvation, "primitive accumulation" in place of original sin. Second, there is the practice, which replaces common morality with the availed formula of a with the exalted fervour of a revolutionary elite, to whom all is permitted.

There is a further feature, however, which is yet more destruc-tive of Christian values. Every religion, however primitive, embodies in its ritual an apprehension of the sacred. Without that apprehension no society can casily survive. Marxism sets. its face against the sacred and laughs it to scorn as the great human delusion. But when nothing is sacred, Nothing is sacred. The Marxist – who is but a mediocre creature like ourselves – begins to believe in the sanctity of Nothingness. An exultant nihilism comes to dominate his sentiments. He cannot thereafter desist from tearing down institutions, laws, customs and values, and a day passed without an act of desecration

is a day lost to Giant Despair.
This sacrilegious frenzy is familiar to us largely from the writings of bishops and theologians. During the 1960s and 1970s the disaffected priesthood overwhelmed the media with its insulting imbecilities. And not one of those who professed to speak for the Christian churches perceived the danger of Marxism: not one of them saw that Marxism in the churches perceived the danger of the markets in the churches perceived the provincian of the precisely a perversion of the religious instinct, a channelling of religious emotion away from its true end, towards the vain task of earthly redemption. And nobody saw, therefore, that where Marxism triumphs, bigotry, hatred and superstition must inevitably triumph in its wake.

Of course, there are important insights in the writings of Marx, as in the writings of Nictzsche, say, or Jean-Paul Sartre. A theologian who wishes to be of his time, and not just the limit the part to influence from in it, must be open to influence from such secular visionaries. But the real question remains: whence comes my faith and my authority? the Church's answer must always be the same: not from this world, but from another.

Let us be thankful that a Christian leader has at last affirmed the selfevident truth, that poverty, in-equality and "exploitation" are egacies of original sin, whereas the Marxist determination to abolish them involves a new sin of our own. The author is editor of The Salisbury

Peter Kellner

Beside the seaside - or Battersea?

Stanley Holloway had a particularly menacing way of describing Black-pool as "full of fresh air and fun"; he made it sound only slightly more appealing than a hi-de-hi camp in January, and almost as dangerous as Kabul after curiew. I refuse to accept that Mr Holloway was simply applying his skills in black cornedy. I

suspect he really hated the place.
For those who fear another sour dissertation on the town's hotels, restaurants and illuminations, fear not. Others, with far more experience, have said it all before. Besides, I only come on the even-numbered years when the excellent company of Labour Party delegates eases the agony. Like most sensible Conservative MPs, I find Tories gathered logether en masse far too brash. raucous and uncivilized - just like the town itself.

Perhaps it would be bearable if party conferences, as was the custom, were held by the seaside, even Blackpool, in May or June. Labour conferences were traditionally late-spring affairs until a few years after the war.

But then some masochist decided to move the conference to the first week of October. So we walk past the deserted beaches, trying to avoid the wind and spray, from bedroom to conference to fringe meeting to bar and back to bedroom again,

pretending, not normally very successfully, to enjoy it. If the Labour Party, or any other, were to plan its conferences from scratch, it is inconceivable that it would choose Blackpool in October: Quite apart from its intrinsic lack of appeal, it is absurdly remote. It is 50 miles nearer to London than Newcastle upon Tyne, but the fastest trains take 20 minutes longer. And, if you set off for Blackpool from other parts of the country, the journey can take substantially

Norwich is only 190 miles away as the crow flies, but the fastest train journey takes six hours 14 minutes. Hull is even nearer - a mere 120 miles, but British Rail assures me that by the time you have changed at Leeds and Manchester, the absolute Leeds and Manchester, the absolute minimum time it takes to go by train is five hours 21 minutes. London and Edinburgh are three times as far apart in miles, but actually closer in rail travelling time.

Then there is the expense. Even if Blackpool were the cheapest seaside resort in Britain, almost everyone who goes there would still have to or rented fooms. Television companies and Fleet Street newspapers need not worry, but many others do: delegates from constituency parties that survive on lotteries and jumble that survive on lotte sales; and the Labour Party itself New Statesman.

which, though short of money, spends thousands of pounds each year taking a large part of its London-based staff to the seaside.

Ah. London. When it comes to

ography, as opposed to economics, I am an unrepentant capitalist. It is easier and quicker for more people to get to London than anywhere else in Britain. Many conference goers. including each party's headquarters staff, already live there, so the costs of holding the conference would be dramatically reduced.

Many other people who do not live in London have friends or relations who do, and could be asked to provide a bed for conference week. And for those who choose to spend their evenings doing something other than attend fringe meetings, or who wish to stay on for a few days after the conference has ended, there is a greater variety of both mainstream and minority culture to enjoy than probably anywhere else in Europe.

Above all, London is where power lies: the home of Parliament, the Civil Service and most of Britain's big corporations and trade unions. Political parties that are serious about power should be drawn to where it is exercised, not retreat to the country's impotent edges.

The conventional response to this is to say that London may be where power is concentrated, but that is wrong: Britain is far too centralized a nation, or group of nations; parties should demonstrate their commitment to spreading power by getting away from the capital and out into the "real" world where the policies of the government, especially this one, collide with the aspirations of

ordinary people. I question this argument on two grounds. The first is that, whatever happens at party conferences. communication at any serious level with the local inhabitants is not one of them. This is not because party officials or conference delegates or visiting journalists are necessarily aloof and blinkered: it is simply that they are, quite properly, preoccupied with communicating with one

The second reason is that nobody who wanted to locate a party conference in the midst of Britain's run-down industry or inner-city tensions would pick Blackpool, even less Brighton. If Toxteth or Glasgow or Consett were chosen. I could Blackpool were the cheapest seaside resort in Britain, almost everyone who goes there would still have to pay a substantial sum in hotel bills substantial sum in hotel bills substantial sum in hotel bills substantial sum in hotel bills.

LETTERS TO THE EDITOR

Contradictions in miners' message

Sir, Mr Arthur Scargill's mastery of

Newspeak is so impressive as to

make him the outstanding Orwellian personality of 1984. When he asserts that the NUM is a democratic

union, this means "democratic" in

the East European sense. When he

claims to be defending the coal

industry, this means he is defending its inefficiency to the mutual hurt of

the captive British users of coal and

negotiate, this means he is ready to

accept the unconditional surrender of the other side. When he complains that Britain is a police

state, this means the police should

acquiesce in violent intimidation.

When he poses as the defender of trade union rights, this means he is

pursuing a strategy that would ultimately result in their being made

totally subservient to communist-

type authority,
His condemnation of Solidarity is

an illustration of this attitude. The behaviour of his "red guards"

affords a preliminary indication of

Marxist policy that deserves particu-

lar attention. This is the perpetu-ation of conditions in which it

would be impossible to cure the

mass unemployment of which they complain. Sympathy for the striking

miners has naturally been strength-

ened by the malaise caused by the general lack of jobs, although there will not, in fact, be involuntary

redundancies in the coal industry.

Moreover the Government, for its part, has given the unhelpful impression of being content with an

Asquithian policy of "wait and see".

Employment could, in fact, be greatly increased notwithstanding

the much discussed problems of

"post-industrial society" - as has been demonstrated so strikingly in

recent years in the USA. For this to

be achieved, however, it would be

essential to have structural change in

industry of the kind being so fiercely

ensure that increases in monetary

expenditure did not continue to be

so dissipated in rising costs and prices that the rise in output was too

small to have much effect on the

demand for labour. For a high level

of employment can be regained only if, by whatever means, increases in pay are restrained. This is an old

warning often given. It is one that,

even today, is sometimes conveyed by the dying voices of the Labour right. But the left will have none of

whatever the party in power.

It is not to be interred that the

From Professor Lord Wedderburn of

Sir, Your report today (September 29) claims: the Nacods (National Association of Colliery Overmen, Deputies and Shotfirers) ballot may

well be invalid and a strike call by

that union would therefore lose legal

"immunity" by reason of the Trade

Union Act 1984. If correct, this

judgment serves to illustrate the futility and injustice of those

provisions of the Act that are not yet

The new law destroys "immun-ity" (that is - if, like Mr Balfour, we

talk "English not law" - the right lawfully to withdraw labour) if a

union ballot paper fails to draw attention to the fact that a strike will

be in breach of the employment

contracts of members involved.

Indeed, the Act demands that the question of breach of contract must

be put to members even if the

proposed industrial action is not a

breach, but only an "interference"

with their employment contracts

(such as an abstention from

voluntary overtime).

If this requirement to put loaded

questions is not satisfied, those who

suffer loss can sue the union and its

officials for injunctions and for

damages. But, as you suggest, few

employers are likely to do so, certainly if they take more than a short-term view of industrial re-

Like its predecessors of 1980 and

1982, the 1984 Act contributes

nothing to the settlement of

public". That statement was made

not to the Farrand committee in relation to licensed conveyancers -

with whom we are well able to

compete on fair terms - but direct to

the Government in relation to the

proposal that banks and building

societies should be allowed to do

conveyancing. That is a very

different matter where we could be

faced with unfair competition, which could well lead to the

consequences which we fear.

of the industry itself.

True position of Durban six

From Dr C. F. Forsyth Sir, Mr J, A. Broom (September 28) argues that the affair of the Durban six is an abuse of diplomatic privilege since "we would...be outraged" if a foreign embassy in London offered "refuge to six British citizens wanted for questioning in connection with a civil disturbance" in the United King-

But Mr Broom seems unaware of

a fact that largely destroys his argument. The Durban six are being sought in terms of section 28 of the Internal Security Act of 1982, which provides for preventive detention, not for interrogation. If the six were being sought for interrogation section 29 would have been used. Interrogation at the hands of the South African police has frequently proved fatal, so the six may take some comfort in the fact that, if prised from the consulate, they will not be subjected to its rigours. But for present purposes the absence of a desire to interrogate the six shows that even the authorities do not think that they have committed a crime or are in possession of information about crime, All that

of the new South African consti-tution. And that is not yet against the law. The six, therefore, are not wretched fugitives from their just deserts but persons being persecuted for the expression of their political beliefs. As such they have nothing in common with the criminal who seeks refuge in an embassy (as Mr Broom would have us believe) or the accused person who flees the country in order to avoid standing trial (as Mr "Pik" Botha would have

they have done is to express in clear

but non-violent terms their rejection

Yours faithfully, C. F. FORSYTH, Robinson College, Cambridge. September 28.

'Pegging' BBC fee

From Sir Robert Lusty Sir, Of course it would be possible to "peg" the licence fee of the BBC (report, September 26) if its facilities were to be thrown open to advertisers. It is neither an original

nor an ingenious proposition.

It would be equally possible to
"peg" the cost of many things by selling away many aspects of what, in the past, we have liked to regard as part of our heritage. The freedom of the BBC as a public-service broadcasting corporation has long been accepted as such. To surrender it would be regarded by many as a folly of the greatest magnitude.

Yours faithfully, ROBERT LUSTY Blockley, Moreton-in-Marsh, Gloucestershire.

A good read

From Professor Richard Cobb. FBA Sir, It was with some surprise that I read today (September 24) under "Publishing", by E. J. Craddock, on the subject of the Booker McConnell prize, that I "admit(s) to having spent two hours with each book, long or short... Amis père et fils

used up a whole morning..."

If I did, indeed, possess such an enviable gift I could have got through my stint of reading in about three weeks, rather than in the 80 days or so of hard summer slog that

"I did not dispose of the two.
Amises in a single morning. For one thing, they did not come in at the same time; as far as I can recall, Kingsley Amis's book took me a bit over a day.

As Mr Craddock knows, some

novels are short, others are very long, so that it would be difficult to lay down an average reading time. I cannot help being an elderly chairman, but I rather resent the implication that I have been, and am, a frivolous one. I have found the experience interesting, certainly, but also burdensome. Yours faithfully,

RICHARD COBB, Worcester College, Oxford, September 24.

Moving house From the President of The Law

Sir, Your editorial today (September 26) mis-states the arguments of The Law Society on two important points.

The Law Society did not, as you state, give evidence to the Farrand committee that the introduction of licensed conveyancers might "reduce rather than increase competition and might destroy a nationwide network of legal services to the

> courses are politically motivated, that their methodology amounts to political indoctrination masquerading as education and free discussion, and that the overall effect is a malign campaign of disinformation.
> This criticism can only be tenable

> if one starts from the viewpoint condemned in the article's first paragraph, that education is intended to condition the minds of the young to accept the existing system.

There is no doubt that peace education asks young people to face ought to do, but there is precious little evidence that existing courses demand of their students that they make particular, one-sided re-

sponses to these questions.

From Professor Emeritus Thomas now by far the most prominent, are Wilson, FBA various demands are contradictory. It is rather that, with basic aims quite different from those of the

be revisionists. They seek to subvert. not to remedy, the present social order. If capitalism fails to generate the fatal contradictions predicted by Marxist theory, it must be provided with them. A "Catch 22" situation must be deliberately created. Unemployment must be denounced as a social evil but perpetuated as a cause of social unrest. The New Keynesia-

democratic reformers, these contra-

dictions are part of the strategy. To

be fair, they have never claimed to

just as much as monetarism. It is of some importance, in the present situation, that the essential features of Mr Scargill's strategy should be widely understood, Natural concern about unemploy-ment should provide an impetus for constructive action but must not be exploited for the benefit of a totalitarian cause.

nism must be blocked and defeated

Yours faithfully, THOMAS WILSON, University of Glasgow, Department of Political Economy, Adam Smith Building, Glasgow. September 28.

From Professor Lord Bauer, FBA Sir, Lord Kaldor (September 29) is critical of closing uneconomic pits without considering differences between private and social cost and the loss of external economies. He accuses the Prime Minister of "lamentable ignorance" for neglect-

ing such calculations.
This argument can be invoked for subsidising virtually any activity, old or new, from horse-drawn transport and the pre-1914 rail network to universal space travel. Any practical assessment of current prospective externalities and differences between private and social costs involves large arbitrary clements.

Such concepts may be valuable as analytical tools. They can offer little guidance for deciding to continue massive public subsidies for particular activities. That is why reliable calculations have rarely been prekented.

Such calculations would need to state clearly the optimum level of output for British coal, the associated estimate for increased sub-sidies, the resulting effect on fuel prices and imports, and the implication for unemployment elsewhere of higher taxes or more expensive fuel supplies for British industry. Yours faithfully. PETER BAUER. House of Lords.

conflict, not with its causes. They do

not even assist negotiation. Even if a

union ballot, for example, negotiates the maze of the 1984 law's

requirements, the union is given

only four weeks in which to

negotiate; after that, whatever its

own rules say, it must repeat the

uted to a disrespect for law and for the courts that have to administer it.

No other major western European

system of labour law today places

upon its citizens' civil liberty to

withdraw labour the restrictions imposed by the new British statutes.

of those systems and our law is their

recognition that a right to strike

ogically imports a right for workers

to suspend their employment con-tracts in ordinary industrial action,

rather than breaking those contracts

as our law insists. When the autocratic legislation of the 1980s is

repealed, we must confront anew

that key issue as part of a restoration

of basic industrial liberties, within a

social accord which seeks consensus

rather than confrontation and which

understands that crippling disputes

about jobs cannot be remedied in

No loopholes in rabies policy

From Mr B. M. Williams Sir, I refer to your Scient Correspondent's article on Ser tember 27 about the rabies risk from nucharses.

The "loopholes" in this country rabies control policy, suggested in Dr James Dunlop, do not exist. I Dunlop is concerned that by nincluding reptiles, amphibians an particularly, horses, in our impe-controls, there is a serious risk rables emering this country. The can be no justification for the quarantining of any of these group There is no scientific evidence suggest that reptiles and amphibiar are susceptible to rabies.

Rabies import controls are d signed to prevent animals of humans in this country from becoming infected with rabie Although all mammals are suscer tible to the disease, quarantine only imposed on those animalikely to become infected or to infe other animals or humans, General speaking, it is carnivores that arresponsible for the transmission rables to animals, and it is main the dog or cat which infects human through biting or scratching.

Horses, in common with rum nants and swine, present no serio risk of spreading disease (the cases quoted by Dr Dunlop re-resent only around 0.5 per cent cases reported in Europe in the given period). In addition, the present even less of a risk in the country because they are impor-subject to veterinary health certif cation (including freedom from rabies), which includes veterinar examination prior to import.

As an additional safeguard, th rabies regulations require any hors to enter quarantine if, whilst bein imported into this country, it come into contact with any animals twhich the full range of control would apply.

The point is reinforced by the fac that a high proportion of horse which move between Great Britai and Europe are thoroughbreds an competition horses which, becaus of constant supervision, are en tremely unlikely to be exposed to th disease.

These regulations are considered to be fully adequate for the purpos of protecting animals and humans in this country. The only threat is is these are breached in any way.

Yours faithfully, B. M. WILLIAMS, Assistant Chief Veterinary Officer, Ministry of Agriculture, Fisheries and Food, Hook Rise South, Tolworth. Surbiton. Surrey. September 28.

disputes. These statutes are con-cerned with the punishment of trade unions and with the rhetoric of Post Office monopoly

From the Executive Director of the Mail Users' Association

Sir, In his letter of September 18 the new Chairman of the Post Office Users' National Council confused the issues of the letter monopoly with privatization and liberalization. It is quite possible, and probably desirable, to relax the letter monopoly while leaving the Post Office intact. The letter mechanization programme has been badly mismanaged and provides no argument for

supporting the monopoly.

The mechanization of letter sorting was scheduled to be com-plete over ten years ago. Customers have received nothing from the programme apart from incon-venience, higher costs and worse service. It was clear from the outset that the mechanization programme would reduce service, but that was not revealed to the public. On the other hand Post Office staff benefited. Management obtained numerous extra senior posts and the basic grades received a generous lead

The recent Monopolies and Mergers Commission report reveals that post code use was still below the target scheduled for achievement in 1970 and that staff savings, originally envisaged at over ten thou-sand and revised downwards to six thousand in 1976, are now being forecast at well under five thousand. However, customers should be aware that half of the staff savings will be made over to the remaining staff. The savings available to benefit customers will therefore be barely two per cent of the wage bill. a figure far too small to meet the capital outlay on equipment and

buildings. Thus, far from being a reason to defend the Post Office monopoly, the mechanization programme provides a startling example of the problems caused for customers by the combination of a monopoly supplier of services with a monopoly supply of labour. Yours faithfully,

M. E. CORBY, Executive Director, Mail Users' Association Ltd., Communications House, 137 Dulwich Road, SE24.

Hash House Harriers

From Mr P. M. Peabody

Sir, I am delighted to see from The Times of September 26 that the Hash House Harriers are established in Moscow. They were not originally formed by diplomats in Malaysia but by a group who lived in the Selangor Club Chambers about 1937/38.

They were instrumental, during the Malaysia emergency, in provid-ing information to MIS as to the whereabouts of bandits in the jungle. Yours truly, PHILIP PEABODY. 7 The Liberty, Wells, Somerset

September 27.

A HAUNTING VOTE

P.O. Box 7, 200 Gray's Inn Road, London WC1X 8EZ. Telephone: 01-837 1234

Mr Eric Hammond, the leader of mise. To Mr Benn, the miners the Electricians Union, who was booed and hissed even before he reached the rostrum at Blackpool yesterday said almost everything that needed to be said to and about the Labour Conference. The cult of violence will haunt this movement for years to come." At this point he was drowned in a wave of hostility until Mr Eric Heffer, from the Chair, appealed for him to be heard on the grounds (advanced, it seemed without intended irony) that it was a Labour Conference which had basic tolerance. That is about the last description that could be rationally applied to the mood of the Conference yesterday which greeted Mr Scargill with a prolonged standing ovation and threw itself not simply behind the miners' industrial case in this dispute, but also behind the leader's intimidatory

methods of seeking to win it. Mr Tony Benn also made it absolutely clear when he answered the debate for the national executive committee yesterday that the party's leadership had no words of criticism against Mr Scargill. The NEC (in spite of Mr Kinnock's tactical misgivings) had endorsed the NUM's motion as it stood, including the assertion that the government's policies involved unlawful actions by the police, organized violence against the miners and the unconstitutional use of a nationally controlled police.In case anybody should have any doubts about where the NEC stood Mr Benn officially declared the party's position. There was no criticism of the NUM for its handling of the dispute; no criticism of the miners who had been "pro-voked" to violence; no wish to

were fighting for everyone from the young unemployed to the blacks harassed by police, and including "us all".

Yesterday's session on the miners' strike and police harassment left no doubt about how the activists who now control the Labour Party see this dispute. Any claim that the miners were striking in the NUM's interests was renounced by Mr Scargill himself, they were, he said, fighting not for the NUM but against the whole concept of this government's economic policy". In other words, it was nakedly a political strike, and nobody minded that Mr Scargill had manipulated it with insurrectionist methods. To counter the public's rejection of these methods virtually every speaker yesterday stood truth on its head with the honourable exceptions of Mr Hammond, and, in his more gingerly way, of Mr Basnett who advised the conference to keep it as an industrial

Picket line violence was exextenuated on the grounds that (in the words of Mr Ron Todd, of the Transport Workers) there are many forms of violence other than cuts and bruises: there was the "economic violence that destroys jobs" and "the state violence" which put pressure on miners' families. Mr Ray Buckton of ASLEF said that "the kind of violence" he was opposed to was that "against us ordinary working class people". The rhetoric of the day presented it as a class struggle in which batons and "Gestapo-type methods" were used. One striking miner, moving a resolution on the police actually offered "greetings from the police state of Nottinghamshire" and said that those

warriors this movement has seen for many years." Some who think that they

"condemning the finest class

have seen it all before at Labour Conferences may assume that all this is no more than the latest outburst of conference rhetoric that has no significance for the real world outside. That would be to misunderstand the mood of the activists, their connexion with the events that every citizen now sees on his television screens and their ability to control Mr Kinnock and his colleagues, who can now hardly resist them. It cannot be a matter of indifference that there was no demand from the Labour leadership for violence on the picket lines to be stopped. It cannot be of no significance that even the Shadow Home Secretary' Mr Gerald Kaufman felt obliged to say that Mrs Thatcher was the real author of violence because

When reason is given no hearing and falsehood masquerades as truth; when a man such as Mr Scargill is the hero of the day, then it must follow that Labour is in very bad shape as a candidate for office. Mr Hammond warned the Conference that electorally the Labour Party would pay for its attitude to violence. If it were not so the prospect for democracy in Britain would indeed be fraught

she had provoked the coal strike,

with danger. A persistent theme yesterday was the media's distortion of the miners' strike. It is a great pity that television cannot run in full, and without comment, yesterday's debate in prime viewing time so that every citizen could see for himself what Labour has now come to. Mr Kinnock will have a hard task to restore credibility to his party when he nudge them towards compro- who criticized the miners were speaks today.

POOR RELATIONS FOR POOR RELATIONS

As Mr Gromyko commuted Nor would the Hungarian press between New York and Washington last week, Herr Erich Honecker must have reflected ruefully on his own aborted visit to the West. What is permitted to Jove is not permitted to an ally. Together, the visit which Moscow ordered and the visit which Moscow indecision of Soviet leaders - or stopped say something important about the future of central

Europe. Over the last year there has been a significant disparity between the tone of Soviet on the one hand, and those of East European states (with Czechoslovakia a dour exception) on the other. Moscow has presented the deployment of new Nato missiles in Western Europe as an almost apocalyptic catastrophe, walked out of arms control talks, and unilaterally declared a nuclear winter in eastwest relations. East Berlin, Budapest, Bucharest, Warsaw. and even Sofia have preferred to talk of damage limitations after the Nato deployment, of the need for a continued political dialogue with responsible forces in the West, and of their heart-felt desire for more West-

ern trade and credits. To describe this as "defiance" of Moscow would be a dire over simplification. In the light of all we know about Soviet-East European relations it is quite implausible to suppose that Herr Honecker did not have some Moscow. With the 40th anniverbacking from Moscow for his. sary of the VE day and the

planned visit to West Germany. renewal of the Warsaw Pact

have supported him against the first broadside from Pravda, unless Janos Kadar too had a sense of this Soviet backing. The humiliating public muddle in which Honecker was then compelled to cancel his trip reflected the weakness, confusion and possibly, differences of view between them. It was just this lack of a single clear line from Moscow which earlier enabled East European leaders to pursue. their divergent policies. Given foreign policy pronquincements, the chance, most East European governments do currently look for better relations with Western Europe, especially where it is to their economic advantage. To this extent, West European

policies towards Eastern Europe have borne fruit. But Moscow is reasserting its control. Having themselves done their best to woo Western Europe away from the United States, Soviet leaders now suspect that the West might be wooing Eastern Europe away from the Soviet Union. The Kohl Government has unfortunately fuelled this suspicion, by continuing the "mini detente" with East Germany while talking far more assertively than its social-liberal predecessor, about the long term perspective of German reunification. The bogey of German revanchism has therefore been revived with a vengeance in

treaty due next year, East Europeans are to be forcefully reminded of the Germanic horrors from which Soviet power is still supposedly protecting them. Meanwhile, Bonn is to be made to see that the road to East Berlin leads via Moscow. East European leaders cannot expect permission to pursue relations with Western Europe until Soviet leaders have sorted out their own relations with the Americans - and perhaps with each other. That is unlikely to happen soon.

This year will therefore have shown both the possibilities and the limits of a semi-autonomous East-West European diplomacy. We have seen that, given the chance, East European governments may incline towards closer political and economic relations with Western Europe an inclination which, if properly encouraged, can also be to our advantage. But we have also seen how little chance they may be given. It was always unrealistic to suppose that a mini-détente in central Europe could somehow lead the way back to global East-West détente. Though the wishes of West European powers may sometimes sway the counsels of the Reagan administration, the wishes of East European states remain a minor factor in the Kremlin's calculations. For better or for worse, the state of relations between Eastern and Western Europe still depends on the state of relations between the super powers - and not vice

HOW LONG THE LANGE HONEYMOON?

New Zealand, traditionally worried over butter, has recently sounded more concerned about guns. For better or for worse its present preoccupation with, or rather against, nuclear weapons is propelling its new prime inherited severe economic diffiminister, Mr David Lange culties including a sizeable towards a left-central position budget deficit, rising inflation among world leaders.

An opinion poll a week ago which gave him a 70 per cent gone. approval rating - rather higher than at the time of his election, reflected the careful, pragmatic approach with which he has entered office. On the one hand . he has shown a respect for economic orthodoxy which has won the confidence of the banking and business community - for the time being anyway. On the other, his concern for social priorities and other day in London that his the plight of the unemployed in particular, has secured a promise refuse port visits to all ships Pacific, - thought by some of wage restraint and cooper- carrying - or suspected of strategists to be the next scene ation from the unions who carrying - nuclear weapons, for East-West confrontation.

helped him to power. Young, stylish, while identifiable Antipodean, he is the very model of a modern Labour minister.

How long will the honeymoon last? His administration has which is expected to reach Mr Lange, who ended a four-double figures next year, balance day official visit to this country of payments problems, increasdouble figures next year, balance ing unemployment and a biggish foreign debt for a country of New Zealand's size and population. All this - and in an age of cessor and political opponent Sir creeping protectionism which Robert Muldoon, and the start of will call for continuing energy a new era in socio-industrial and skill to market its national relationships. In this respect at dairy products. As one of its ministers said the other day, not only did they find the cupboard bare but the cupboard itself had

> · These economic problems will make it difficult for Mr Lange to satisfy the aspirations of his party's left wing, whose patience will not last for ever. This in turn will allow him little room for manouevre overseas where he seems to be heading for some kind of confrontation with Washington and possibly with Canberra too. He insisted the Tranquillity" (Mr Lange's own government's determination to outpost of the West in the

represented his own views too and that it had long been party policy. But the realities of powe may soon make him regret that it is so. The United States, the most obviously affected allied nation, is important to New Zealand in economic as well as military terms.

New Zealand's security relationship with the United States is codified by the ANZUS pact -Australia being the other partner - which for 33 years has linked the Antipodes to the Western alliance. Mr Lange insists with equal vigour that his government is not anti-alliance or anti-American - only anti-nuclear. The result of left-wing pressure however is that he has been saddled with the task of re-negotiating the pact to dilute its military character - if only to accommodate his country's nuclear reservations.

In this he is likely to find some help in Washington where the State Department is not entirely unused to coping with governments which are on the horns of a political dilemma. New Zealand, while living in a "pocket of phrase) remains an important

Education for peace

From Mr Robert Creighton Sir, I was astonished and distressed to read your leader "Disinformation and education" (September 25). There are many points in it with which one could take issue; but the factor which amazed me most was the way in which the article fell victim to the very evils of which it accused peace studies - misrepresenation, one-sidedness and partiality.

wider spectrum, from the level of

some fundamental and important questions about themselves and their society, as all good education

Christie's, the fine art auction. American galleries, while there eers, predict that a charming are plenty of works in England. portrait group by Joseph Wright of Derby that they are to sell on November 23 will become the third British picture to top the

film mark at auction. Two Turners have sold for seven figures at auction, but Wright of Derby is a second division artist. This is one of his greatest pictures, Christie's say. The painting depicts "Mr and Mrs Column setting out to ride", the woman on horseback, the man at her side and a

challenging the woman's mount to a bit of fun. Family tradition among the Columns says that the spaniel was painted by George Stubbs, who was friendly with Wright. The portrait dates from around

brilliantly delineated spaniel

The sale is certain to start a sharp controversy about the national heritage. If this is Wright's best portrait, it should not be allowed to go abroad, the argument is likely to go. But the fact that Christie's have dared to suggest a valuation of more than film reflects the fact that

By Geraldine Norman, Sale Room Correspondent

The painting has been in the family of the siners since the eighteenth century and is sent for sale by Mr Charles Rogers-Coltman, a Shropshire farmer. He has inherited several other paintings by Wright but his masterpiece apparently represents too large a proportion of his family assets to keep without worry,

The Thomas Colt in the portrait was a friend of Wright's and a considerable early patron. He married Mary Barlow in Astbury, Cheshire, in 1769 and the picture was painted a few

years after their marriage. The art market is rumbling with amazement at Christie's putting so high a valuation on the painting. "There are, of course, several British paintings worth in excess of a million one dealer said yesterday, "but Wright is only the captain of the second division. One would not

Professor Inga-Stina Ewbank, Hildred Carlile professor of English literature at Bedford and Royal Holloway College. London, has been appointed to the chair of English literature at Leeds Univer-

sity. She takes up the post on January 1, 1985. From 1960 to 1972, Professor Ewbank held successive posts at Liverpool University before shoving to Bedford College as reader in English literature. She was elected Hildred Cartile professor of English literature in 1974.

Professor Inga-Stina Ewbank

Dr Gwyn E Roberts, MA, MB, BCa, has been appointed as foundation professor of mental handicap in the medical school. He will take up his chair on January 1, 1985.

A university spokesman said:

"This is an exciting new development in a discipline which has hitherto seen the establishment of very few departments in univer-

sities".

A charity associated with Mansfield Brewery has donated £55,000 a year for five years towards the cost of an academic development of the subject. Researchers will be collabo-rating with the Trent Regional Health Authority and Nottingham Health Authority. . Cambridge news, page 28.

Science report

Experts seek causes of birth deformities By Pearce Wright, Science Editor

The number of bables born group of experts has reported with some type of deformity in to the European Chemical

Damage is not always recog- the present meth-nized easily at birth. Some ing substances. defects are detectable only a few weeks, months or even years later. Those late effects may disrupt development of the brain and nervous system, of

metabolic processes (such as the ability to use insulin); of the heart and blood supply network, or of the arinary

Because they are not apparent at birth, those disorders are often excluded from estimates of congenital abnor-More importantly, perhaps, understanding is limited about

how and when damage may occur in the reproduction cycle. Hereditary factors are responsible for a significant proportion of defects. Another cause is exposure to chemicals, drugs, radiation, alcohol or infections. The number of deformities pro-

duced by those agents is . Against this background, a in people.

alcohol

western Europe is between two Industry Ecology and Toxiand three in every 100 births. cology Centre in Brussels on the present methods of check-The report examines the

individual stages of repro-duction, beginning with the egg and sperm before mating; and going or to fertilizaton; implantation of the embryo into the uterus; development of the foctus; birth; lactation and maturation.

The methods range from predicting the biological effects of a substance by computer analysis of its structure, to test-tube and animal experiments, and the screening of medical records. The report emphasizes that, even when a chemical has been

tested by the most appropriate and sensitive methods, a possibility remains that the potential damage to reproduction exists but is not revealed by tests. It also points out short-

comings in the use of animals for forecasting some of the disturbances that might occur

MR HAL PORTER Australian novelist, autobiographer and playwright

Mr Hal Porter, who died on September 29 at the age of 73, was one of Australia's most distinguished writers. Novelist autobiographer, dramatist and short story writer, as well as having published several volumes of poetry, he will probably be best remembered for his extraordinary autobiographical work. The Watcher on the Cast Iron Balcony, which had two lesser sequels, and his novel The Tilted Cross. Several of his plays had also been soon in this Hal Porter was born in Albert

OBITUARY

Park, Melbourne, Victoria on February 16, 1911. His early life was spent in the country town of Burosdale. Victoria, and his first Job was as a reporter on the Bairmsdale Advertiser. He was a schoolmaster for 10

vears, from 1927 until 1937 then again from 1941 till 1949. He spent a year in Japan with Australian Army Education (1949-50) before returning to Director of become National Theatre at Hobart, Tasmania (1951-53). Hal Porter made his debut as a writer at the age of 31 with the collection, Short Stories (1942). It was immediately apparent

distinctive talent. Porter had a fine ear for dialogue, an acute eye for detail, and was a delicate tracer of psychological nuance. Porter was perhaps the first truly artistic Australian writer who, while drawing freely on the European tradition, re-mained effortlessly Australian without strain or selfconsciousness. He felt an affinity with

such writers as Colette, Eudora Welty and Sir Victor Pritchett, but nonetheless felt perfectly at home in the southernmost Australia about which he mostly wrote. That he was overshadowed by his illustrious contemporary, Patrick White, does not make his own contri-

bution to specifically Australian writing any less. His vision was not as imaginative as White's but he told his readers much

more about Australia. Porter wrote four plays (and a television play and one episode in the film Libido, 1973) which though not drams of major stature, have been widely praised for their mastery of technique and for the advance they represented in terms of Australian theatre. The best of these. The Professor, an experimental tragedy about Australo-Japanese cultural relationships. was a piece of some power, and was seen at the Royal Court in

But Porter reserved his real powers for his fiction. He himself diffidently felt that he lacked fictional skill and imagination; but of his three novels The Tilted Cross (1961) is outstanding by any standards.
A vivid reconstruction of the
19th century convict artist Thomas Griffiths Wainewright it is certainly one of the major novels to have come out of Australia in this century, and ranks only just below the classics of Henry Handel Richardson, Leonard Mann, Christina Stead, Patrick White, and Randolph Stow.

The Watcher on the Cast Iron Balcony (1963) is equally outstanding; it is a mercilessly candid self exposure, telling of how knowingly - without the often arch innocence of autobiographers - he grew up, and learned to develop an artistic detachment. It is a remarkable iestament. Porter wrote seven books of short stories including Selected

Stories (1971); three books of verse; and two more books of autobiography, The Paper Chase, (1966) and The Extra (1975). He also wrote about Japan and published a History of Bairnsdale.

DR J. H. C. MORRIS Dr J. H. C. Morris, QC, FBA, Fellow, Clerk to the College and

tutors in his day, and enjoyed an international reputation in Private International Law (or the Conflict of Laws as he preferred to call it) and in the Rule against Perpetuities. John Humphrey Cartile Morris was born in 1910 and

educated at Charterhouse and Christ Church, Oxford, where he read law. After being called to the Bar by Gray's Inn in 1934 he practised at the Chancery Bar in the chambers of Sir Andrew Clark until 1936, when he was elected Fellow and Tutor in Law at Magdalen College. Oxford. He never regretted his

decision to leave the Bar. Legal studies in Magdalen at under Morris direction the reputation of the Law school steadily rose. Meanwhile he had been making a name for himself in the Conflict of Laws, he was appointed All Souls Lecturer in 1939 and University Reader in 1951; and in 1950-1951 he spent a year teaching that subject as Visiting Professor at the Harvard Law School.

He was a prolific writer. His first book was a collection of Cases In Private International Law with editorial notes (1939), which ran to three editions. He edited the 9th, 10th and 11th editions of Theobald on Wills and was responsible for the 6th, 7th and 8th editions of Dicey's Conflict of Laws and the 22nd edition of Chitty on Contracts. With the American W. Barton Leach he wrote a textbook The Rule against Perpetuities. In 1953-1954 he served as a

co-opted member of the Lord Chancellor's Law Reform Committee which was consider-

ing the reform of the Rule against Perpetuities, and many of his ideas eventually found expression in the Perpetuities and Accumulations Act, 1964. In 1964 the Vinerian Chair of English Law at All Souls College fell vacant, and Morris was strongly tipped for the suc-cession. The Chair was offered to him, but to the surprise of his friends and many academic lawyers he declined it. He was devoted to Magdaien, which he. Jane Kinch. There were no served long and faithfully as children.

who died on September 29 at (for one year) as Vice-President, the age of 74, was one of the and could not bear the thought most successful of Oxford law of migrating to All Souls, for of migrating to All Souls, for which he had a life-long antipathy. He used to say that its buildings ought to be transferred to the University for use as offices, and its revenues divided among the women's colleges.

He had no antipathy for Cambridge, however, and after his retirement in 1977 he greatly enjoyed spending a year there as visiting professor and Fellow of Gonville and Caius College. One of his many comparative observations was that Cambridge was a place for making friends while Oxford was one for making enemies.

Apart from the law the great interest of his life was sailing and cruising in small yachts. As soon as the summer term was over and even before, he used to go down to the Hamble River and spend the rest of the summer cruising on the coasts of NW Europe with his wife and a couple of friends. He was a member of the Royal Cruising Club, a frequent contributor to its Journal, and five times a winner of one of the Club cups for the best cruises of the year.

During the war of 1939-1945 he had served in the RNVR. first in the Faroe Islands and later at Major Landing Craft Headquarters, Troon, rising to the rank of Lieutenant-Commander.

He was a member (for a short time) of the institute of international Law and an honorary associate member of the American Academy of Arts and Sciences. He recieved the degree of DCL from Oxford University in 1949 for his work on the Conflict of Laws. He was a very large man.

whose size and girth seemed to increase regularly with the years. He was a stimulating and popular lecturer, but (without always realising it) he could be terrifying to his pupils. His nickname "Doctor John" well expresses the mixture of awe and affection with which they regarded him .ln. 1939 .he married. Mercy

warning the Government - yet again - of the critical shortage of high technology manpower the focus was put on industry. Industry would be the saviour and provide finance and facilities that have not been provided in the past. The MSC report has made number of proponents of the

It was industry which was to provide the impetus - possibly by awarding contracts - for the supply of much needed engineers. It would even be industry which would fund a new technological university. The MSC report indicates that industry appears to be struggling adequately to fulfill its responsibilities without volunteering **Гог апу тоге.**

'industrial solution" a little anxious.

The depressing NCS report was

followed by the publication of the response of the Engineering Council to the University Grants committee's report, published in mid-September The council want a 10 per cent swing. away from arts to engineering science. about £100m more a year to be spent on the creation of more course places for engineers, for industry to liaise more with academia and vice versa and for industry to be prepared to fund further training, usually in the form of refresher of retraining courses. The switch from engineering to arts would mean the 55 per cent of student places would be devoted to

science based engineering places. That strategy would be a historic and imaginative move to help Britain arrest a growing multi-million pound IT trade deficit and attempt to match-the number of engineers being produced by the UK's principal industrial rivals.

About 8,000 professional engineers are produced in Britain each year - a poor performance when measured against the 70,000 of Japan, 60-68,000 of the United States, 30,000 in France and about 15,000 in Germany, Is it right therefore to depend on industry so much?

Dr Jack Williams director of productivity technology and innova-tion from the US Department of Commerce, on a visit to London last week, gave us a glimpse of what it could be like if Britain emulated the

proponents of more British industrial participation. The list was impressive. • The university-industry connection is very diverse contracts, grants, gifts, purchase orders, loans of equipment or facilities, discounts on equipment, personnel exchanges, scholarships and consulting arrange-

 1BM had about 400 collaborative projects with 100 universities where technical problems of common terest are studied.

Reasons given by US companies for cooperation with universities. access to manpower, access to the technology, problem solving information, prestige and the encomonical use of corporate/academic resources.

The marriage of industry and academia encouraging the transfer of personnel is commonplace in the United States and one of the favoured

options of the Engineering Council. The American envoy last week highlighted many such successes -Carnegic Mellon on robotics. Case Western in applied polymers, MIT In manufacturing technology, North Carolina State in communications and Stanford in integrated systems.

The result is not only more effective R&D but the creation of an atmosphere in which engineers. scientists, computer technologists can better trained. The professors will able be to "commute" between academia and industry fertilising research, selling innovations to they are practising technologists who can teach their students the ways of the real world not just scientific

The switch required by the Engineering Council would make the industry-academic marriage even more vital. More than 4,000 newengineering places would be created each year but those students would then require more facilities for nonacademic training - a factor which is. vital in the education of technologists. Allowing their professors the oppor-tunities to keep up to date is equally important. Again the principal role belongs to industry it is vital for Britain to get the formula right.

. British industry will have to get its own house in order and then respond to the challenge.

A time for analysis and self-criticism

In the hight of last week's reports it is time for industry to conduct its own analysis and self-criticism.

it may then be able to produce a valuable strategy of its own without feeling coerced by others, It is long

the front again

Last week IBM completed a move which it believes will take it into the forefront of telecom-munications. The American computer giant bought the remaining 77 per cent it did not own of the US private branch exchange manufacturer, Rolm.

Just over a year ago, IBM purchased 23 per cent of Rolm's shares, taking their first step in telecommunications. Since then it has announced its intention to launch a local area network, and both a network for linking personal computers together and one for use on the factory floor, linking robots and computers. It has also launched a cabling system for wiring buildings for future communications in data, voice and.

There is also IBM's proprietory networking system -Systems Network Architecture (SNA) - which will be used as the basis for the joint IBM/Bri-tish Telecom venture to set up a national information network.

But what has been lacking is digital, fully integrated voice and data private branch ex-change (pbx). Rolm was meant to previde that IBM has been trying to develop such a system for many years but has failed; Rolm alone with companies such as American Telephone & Telegraph (AT&T) and North-em Telecom, has been at the refront of pbx design

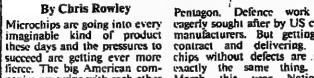

Rolm was expected to launch the first frutis of its joint work with IBM within the next few weeks, and that could have spurred IBM on to approach Rolm with a view to total takeover. The initial 23 per cent was just a test, and barely significant in terms of IBM's total business. The company appears to be sure that Rolm can deliver the system, and that was enough to make IBM take over the company - the first for

But IBM's move could also have been precipitated by other vents: the investment by T&T in Italy's Olivetti and the more recent merger between ICL and Standard Telephone

IBM's takeover of Rolm is different however. The two have been working together for over a year and are poised to aunch the first product of their collaboration. It is a proven partnership, not one which has still to be rested:

With industry moving rapidly towards convergence Rolm thought it would be best served by allying itself closely supplier.

US. The examples encouraged the America and Japan: why the chips are down with the best-selling micro-processor of each succeeding generation. The Japanese have taken over the market for such mass produced items as 64K dynamic RAM chips. Their

panies are vying with each other this year's business, the while keeping an eye on the Japanese. Making silicon chips without defects is still a tricky business. It requires "clean rooms" for manufacture that have dust

evels a thousand times lower

than a modern hospital operating room. Making chips is an enormously complex process and defects can crop up anywhere along the line. Thus semiconductor customers usually pay extra to have been through tests with up

to 200 steps. The chips have been baked and/or frozen and still shown to work.

Pentagon, Defence work is cagerly sought after by US chip manufacturers. But getting a contract and delivering, the chips without defects are not exactly the same thing. In March this year National Semiconductor pleaded guilty to delivering chips to the department without putting them through the department's

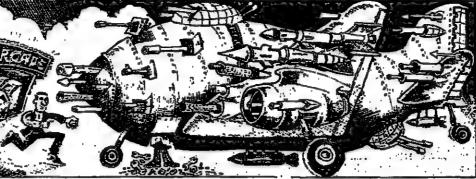

National Semiconductor received a £1.4m fine.

rigid specifications tests.

This month it is the turn of Texas instruments to receive public criticism from the Pentagon. Some TI chips, made in Taiwan and supposed to have been tested in TI's Midland, Texas, plant, did not undergo all the tests they should have. Thus potentially fallible chips have now been put ino computer systems for the F-15 tighter and the B1 bomber.

One of the biggest customers

Texas Instruments react anin the world for chips is the grily to the charge. "We have

vet to find one defective product". Max Post, a company spokesman, said. Other observers of the US industry sympathize with Texas Instrunents, noting that this is not an isolated incident.

They noted also that the American chip makers have made great strides in improving manufacturing conditions and imposing stringent testing pro-

cedures. No longer is it true that the worst Japanese-made chips have six times fewer defects than the best American ones. Now, in fact, US companies are achieving similar defect ratios to the Japanese.

In addition some critics of the Pentagon out the blame on a lack of supervision of what is a complex manufacturing process of some of the most vital omponents of American wea-

"Time bomb" programs are a popular prank played by computer science students at universities – 'a program is hidden somewhere in the computer's memory and at a specified time it is executed. crashing the whole computer or crasing important files and finally deleting itself, so no-one will know who wrote it.

The "Trojan Horse" is another method by which people can defraud systems. By adding extra commands to a program, a person can perpetrate a crime, while it looks as though he is doing something

It is worth noting that all the figures given in this article are thousand times and he could set admit that organized crime himself aside a very nice nest-could be involved. Whoever the egg, without anyone else being criminals are, there is no doubt that the occurrences of these frauds will increase.

> As they said in the television programme, "real time [compu-terized] banking is bad news for lots of people - there's going to be many a payroll bandit looking for other new openings when pay envelopes contain only computer slips. You're going to look rather silly, going over a bank counter with a shotgun and a pickaxe handle, if computer terminal and satellite

may have found its winner By Roger Woolnough

The people at Passim Computers, a small company in Northampton thought they were on to a winner when they heard about a development by National Semiconductor. The Silicon Valley signt rese particular Silicon Valley giant was putting together a device called a multifunction controller - a collection cuit board that would make it easier and faster to run systems by Digital Equipment Corporation (DEC).

im was ideally placed to exploit the controller and had become the first UK distributor for DEC-compatible memory

But before Passim had a chance to show its paces with the new product, National decided to stop production. "We went to National and asked whether we could buy it," says Passin's marketing director, Peter Wright. "They licensed as for three years, and after that it comes completely to us."

The multi-function controller, known as the HEX3000, is now not only being made and sold in Britain. Passim is planning a coals-to-Newcastle, and hopes to market it back to the States. The controller is a fairly

specialized bit of electronics wizardry, but can solve problems for DEC operators. sub-systems, DEC provides a

piece of equipment called the RH11. Even though it also controls a communications device called a multiplexor, the RH11 is quite a large box compared with other examples of electronics hardware.

"Some years ago," explains Wright, "several American companies realized they could get all the electronics on one board, and there are many manufacturers now making single-board controllers."

But this led to another problem. Controllers of this kind will do only one job, such as control a disc drive in one particular way. "If a user upgrades his system, the controller has to go," says Wright.

Nor is that all. To control the tape sub-systems and

Peter Wright, marketing director multiplexor, additional controller boards are required. As a result, users may end up with a many as six different boards. Passin's HEX3000 sim-pliffes all this by using a single

board to combine any two functions of disc drive tape controller or multiplexor hence the description "multi-function". By using programs contained in read-only memordevelopment of their Nato ies, the HEX3000 is instructed to behave in the way the user

For a small company, Passim had invested a lot in the HEX3000, but with a unique product it may have found its winner after all.

Passim Computer-unread in the Red Army

Moscow - A plea from a Red Army general for computer-lit-erate officers is fresh evidence

that human and political prob-lems are holding back the Union in its effort to catch up on the technological revolution.

"Anyone who thinks that in our age he can manage without modern media and methods of command is suffering from a dangerous delution, said Major-General V. Ryabchuk, a scientific specialist, in Red Star, the armed forces' newspaper.

He complained about the quality of military computer hardware and urged new training methods to turn out to use data systems to assist in making their decisions.

His comments followed complaints in the official press about those who are wary of electronic systems, and factory managers reluctant to put their robots to any good use. Western experts say the

public comments reflect growing concern among Russian leaders as their country fails to close a widening "computer gap" that has opened up with the electronic explosion in the western world. But the gap is likely to widen further because. for all the economic benefits it could earn, modern information technology poses a major political dilemma for the Russians.

After a visit to Moscow, Russians.

> Western European countries and their domestic electronics industries must assess for themselves the possibilities and the prospects of cooperation with the Soviet Union. But they ought to consider the damage the electronics embargo might do - not to the Soviet economy, which has many times demon-strated its ability to survive such political obstacles - but to their own economic health and independence.

Senior Computer Auditors

£ Negotiable

As part of a programme of expansion, our client, a major firm of Chartered Accountants, is seeking to appoint a number of accountants to provide and develop computer audit services throughout the country. Opportunities exist in East Anglia, the South Coast, Bristol and the West Country and Scotland. The successful candidates will assume responsibility for the provision and development of computer audit services and will be based in a convenient office within that region. In addition, there are opportunities to join existing computer audit teams in London, the Midlands and the North of England.

These challenging opportunities will include the evaluation of controls in clients' systems (from major mainframe based clients to distributed or small business minis), the development and implementation of in-house and client based computer audit techniques and the provision of micro computer advice both as regards hardware and software. The successful candidates will be expected to liaise between audit, computer audit and management consultancy in order to ensure the fullest development of

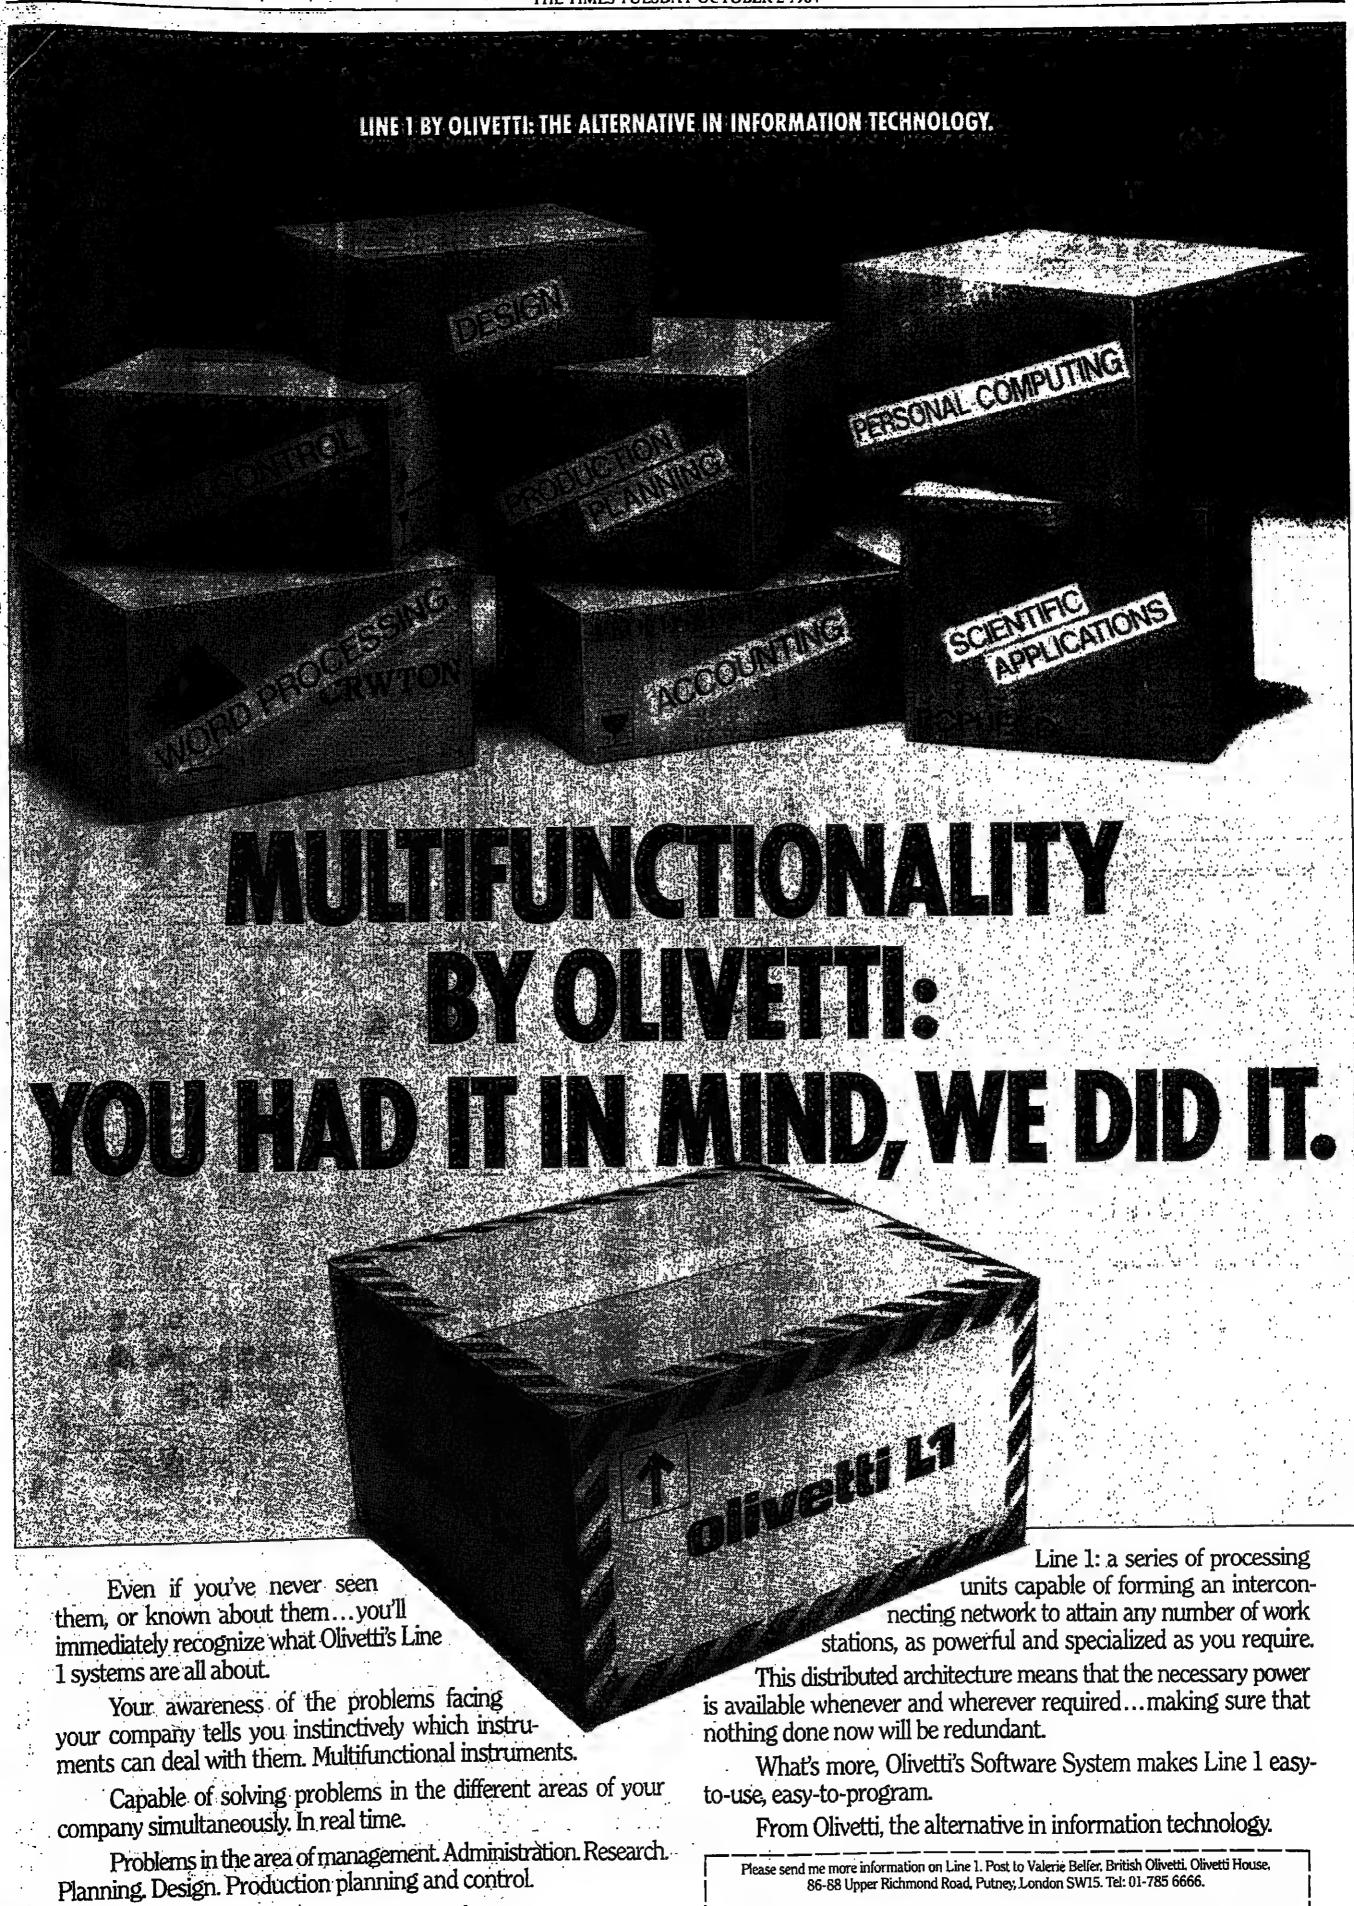

Aged 29-35, applicants should be Chartered Accountants who have the personality and presence to motivate and communicare effectively both with clients and colleagues at a senior level. Excellent technical, personal and communicative skills are therefore required. Salaries will be competitive and interested candidates should contact Charles Macleod, on 01-405 0442, or write, enclosing a comprehensive c.v., to Michael Page Partnership, 31 Southampton Row, London WCIB 5HY.

COMPUTER SYSTEMS GUARANTI If we said we could provide vou with a professional fully integrated solution to your office procedural problems, you might say "prove it". Well, we can. FINANCE AND INDUSTRY **Executive Editor Kenneth Fleet**

Old Lady needs a better early warning system

Not many of the brothers and sisters that which originally attracted its atten-attending the Labour Party confidence in tion. Charter has acted in a public spirited Brighton may have noticed it but yesterday a bank was nationalized. Johnson Matthey Bankers is hardly a household name, yet its instant and complete collapse so threatened banking confidence and the bullion mariket, not to mention the rest of the Johnson Matthey group, that the Bank of England was fit, at the eleventh hour with include but to take it into the public serior where it may be the mass with other passes from the rast when resis with other names from the hast the Slater Walker.

14 12 12

Charter Consolidated picks up the pieces of the rest of the group, encompassing precious metal refining paints, ceramics, chemicals, and a host of related activities. The episode is deeply disturbing when the City is possed to enter the promised land of deregulation and financial super groups. It mises worrying questions about the Bank of England's existing system of supervision, let alone what might be needed in future.

It seems that one of the City's oldest banks staked its future and jeopardized that of the group on two loans apparently to African borrowers. The auditors were called in some weeks ago and by the beginning of last week the total of deficiency of possibly £150m was more than the bank's capital.

than the bank's capital.

Charter became involved on Friday and partly recapitalized Johnson Maithey by putting in £25m of conveilible prefetences shares, which, if exercised would prize it holding to 46 per cent that that was not chough because of the heavy requirements for working capital and the severe undercapitalization caused by the jail's collapse. So a banking syndician has extended the company's areas lines by \$1250m. Even so, Johnson Marthags the world hits slumped from £460m is about £265m.

At that stage the authorities hoped to find another bank to take over Johnson Matthey Bankers. Discussions last week produced the Bank of Nova Scotia. The crisis came to a head at 9.30 on Sunday evening when the pescuing banks and donly backed out.

The deal eventually struck when the jest of the city was at bleaklast is greatly to the credit of allocations and shows that the Bank of England has jost mand of the skills. Johnson Matthey group paid the Bank £50in to take the fatally holed banking operation off its hands.

So a proud and ancient name has all but disappeared. Charter has cultaried its structure Crisis management is no stake, but hardly in the same commany as substitute for crisis avoidance.

way to help rescue Johnson Matthey. The latter's shareholders have reason to be grateful, but whether Charter's standing in the eye of jaded City attalysis will improve is another matter. Charter, in the person of its chief executive and deputy chairman, Mr. Neil Clarke, who now becomes chairman of Johnson Matthey in place of Mr Harry Elewite is now to all intents and purposes rusning the rump of Johnson Matthey's industrial interests.

Meanwhile, the Bank of England faces the embarrassment of being one of the five members of the London gold-fixing ring and a size from 1974 will be retrieved from some thee hasement and the Bank will briskly set about disposing of whatever dandind a buyer. But the general questions remain. How did the problem remain tindetected, by both bankrs and bank supervisors for so long. The episode seems to expose dangerous weaknesses in the Bank of England's supervisory apparatus even though it was reformed after the atus, even though it was reformed after the

The existing supervisory system de-pends heavily on the banks' judgment of the quality of their loans. Auditors are the first line of defence, it is crucial to this sorry tale that Johnson Matthey's audifors, Arthur Young McClelland Moores did not qualify or make any reservations about the accomets.

Nevertheless, the Bank of England is supposed to be informed of any loans greater than 10 per cent of a bank's capital. Far some time the Old Lady had been concerned about the position of Johnson highlies Builders but it string that these the big loans task alarm bells only late in the day?

of he critical minediate seed was then to saleguard confidence. That objective has been met admirably. In the future, however, most substantial financial service groups in the City will be partly built aroundla bank. Charter itself will be an 8.9 per teni shareholder in the glouping which includes 5.G Warburg. The repercussions of banking difficulties will therefore be that much more intense and spread that much laster: 7.2

It would be complacent simply to write off the collapse of Johnson Matthey as an isolated case of bad loans. Shareholders and a wider public, need to be assured that banking supervision will in future take full account of the City's rapidly changing

Bank of England fears slower growth and rising inflation

The Bank of England, in its latest Quarterly Bulletin, is cautious about British growth prospects and concerned about inflation. The overall economic assessment from the Bank is considerably more pessimistic offset by higher investment and

that of the Treasury.

The Bank stresses the role of the miners' strike in unsettling financial markets. Government ministers have tended to play down the impact of the strike on market confidence.

The Bank takes the view that growth is slowing, even after the effects of the miners' strike have been excluded: "The industrial disputes have directly reduced growth this year from the rate of about 3 per cent achieved last trends in exports. The drop in year. Some eventual slowing the average value of sterling had been widely expected and over the past year (although the had been widely expected and over the past year (although the there are signs that even after latest sharp fall has not been

HOW MANY INVESTORS IN BUSINESS INVEST IN THEIR OWN BUSINESS BRAINS?

At most investment companies, there is never a shortage of financial brains. Whereas business brains may often be very thin on the ground – if there are any at all.

At 3i, on the other hand, you'll meet both. But you won't meet a single stuffed shirt.

We're a private sector company and our attitude is both creative and innovative. And, because we're businessmen, we're quick to recognise a good basiness challenge.

Equally, and in all modesty, we are well equipped to act on our decisions.

Within 3i, we deal with large projects and are prepared to back any one company with up to £35m or more; we have ICFC,

32 INVESTORS

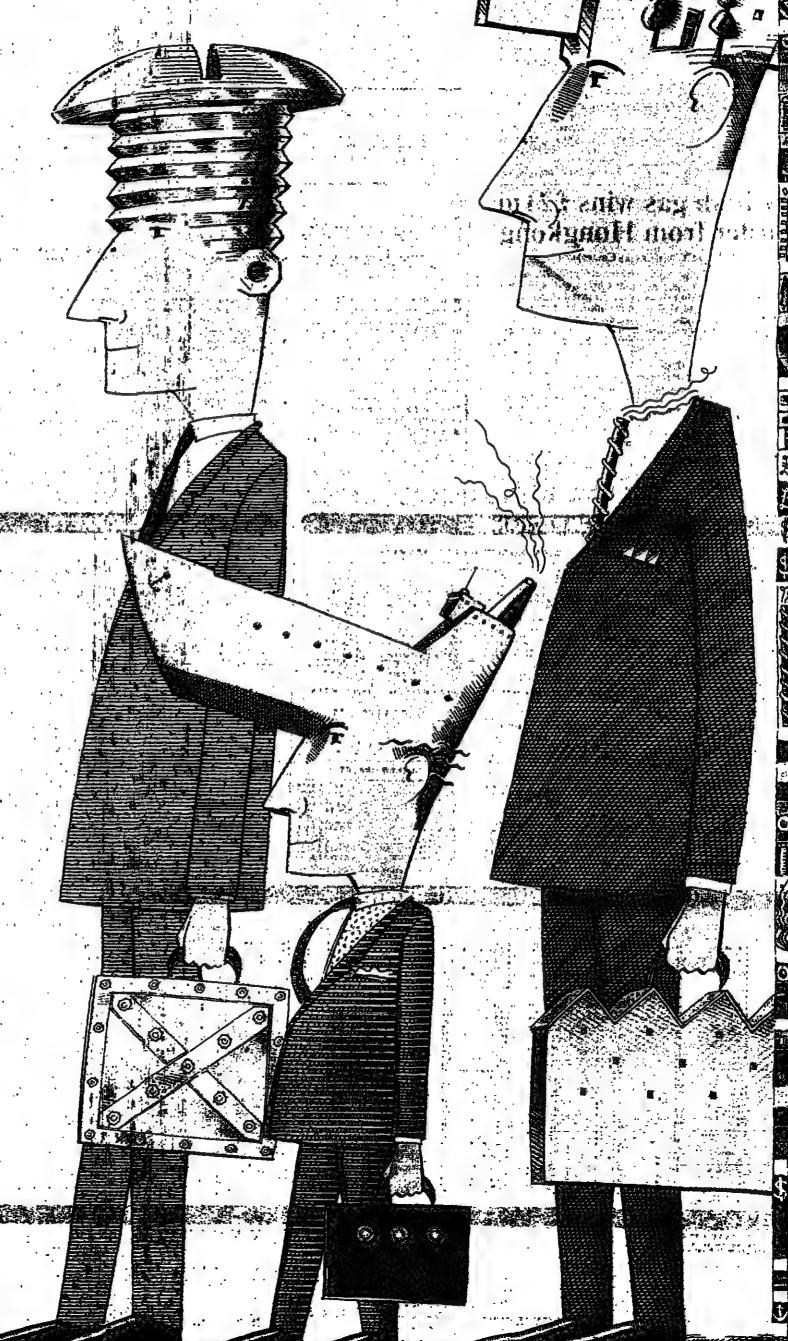

whose understanding of small companies' problems is unique; and our Ventures Division who specialise in

high-technology businesses.

Up to now, we have enjoyed long-term relationships with over 8,000 businesses. But we're always looking for fresh opportunities.

Thank goodness we've got the brains to recognise them when they arise.

The creative use of money

Hidden appeal beneath Currys' flat figures

sell recently in favour of Dixons for fairly obvious reasons. Currys 30:50 sales split between brown and white goods seems less growth oriented than Dixons' 100 per cent brown goods concen-

Analysis dislike the small average size of a Currys store, and wonder too about the commercial wisdom of relying so much on credit sales - sti about 40 per cent of total turnover. Last month's withdrawal from the small business computers market has not provoked optimism over the quality of Currys' manage-

> To some extent, the interim figures confirm these fears, Tough trading conditions show up in the £41 m drop in gross profits to £5.2m. The interest bill has jumped by 62 per cent to £1.4m. The underlying sales growth rate is just 7 per cent, after adjusting for hire-purchase business. Presumably any stores group which imports a design consultant to look at the chain is unhappy with the present format.

But even allowing for the drop in credit trading balances of £4m to £41.7m - which in turn suggests that the consumer boom is beginning to enter the final stages of the cycle - it looks unwise to write the group off completely. Curry's is still a powerful organization.

This shows through in the composition of figures which make up the difference between trading and pretay profits. At last year's interim stage, gross and pretax profits were almost the same at about £914m. as asset sales of £3m complemented a £2.4m debit on the HP account; new business outweighed repayments.

This year, however, a £5m. plus upturn in the HP account. as trading conditions return to near normal, leaves pretax profits £1m down at £8½m. And these figures have been struck after absorbing about

computer chain. With unmatured profit in

the HP account still worth £29m, the group has still to. bring through to profits sthe: full benefits of the spending-boom in the early 1980s. The group has enough muscle to recover against nimbler competitors, and bid appeal too if the counter-attack fails. A speculative buy at 260p?

Mills & Allen

The headline-catching element at Mills & Allen is the group's imaginative plan to float its media side, thus transforming itself into a fully-valued binary operation, half money broker, half holding company, Hopefully, in this case, two and two

make five. Less obvious, however, have been other divestment moves, which show up in a £3m net surplus below the line, plus the careful link with the Tokyo money market, via joint venture deals with Cleda Tanshi, Such moves look to form part of a coherent master plan, aimed, on one level, at providing a round-the-clock money and security broking service in the London-New York-London triangle, On a second tier, Mills &

Allen sounds keen to open up the retail financial services market, which sells direct to

the public.
On this basis, it would make perfect sense to float the whole of the media side, netting perhaps £40m to provide the start-up capital for the retail services side. But if the group linishes up with around £50m cash in the balance sheet after its various corporate manoeuvres, fending off the predators may eventually pose insuperable problems. At 325p, the shares are a hold.

John Menzies

The stores sector caught something of a cold yesterday and despite good interim results.

Currys has been a fashionable. Elm of closure costs on the 7p to 191p. It seemed an overly-harsh reaction. The shares may not offer too much to go for in the short term but Mencies remains a fundamentally strong business.

At the pretax level, profits were up by more than £1m to £3.5m boosted by improved contributions from the library supplies and stationery operations which have been sucvessfully intergrated into the

group structure.

Menzies has also sold the Lonsdale Technicia group acquired sa part of the Lonsdale Universal talkover two years ago. The sale fetched £7,75m, which is well in excess of the £6.3m which Managers paid for the entire Lonsdale

group.

The cash will be set against borrowings, which had risen to more than £15m at the end of last year. This, together with continued strong cash, flow, will ensure that by the end of the current year the group will have a positive net eash

Another move which would help the group's balance sheet is the sale of its leasing interests. There cannot be too much future for Menzies in this field, and it will come as no surprise if the leasing company is sold shortly with an immediate £9m reduction

in borrowings. Civen the light family shareholdings at Menzies, the goup does not want to use paper to finance acquisitions. By the year-end, it will be in a position to move one the takeover trail again as it looks for more growth potential and a further opportunity to even out the imbalance between the

two haives of the year. Christmas still remains key period for Menzies, but with the retail division doing well there is no reason to expect a disappointment. The wholesale operations are doing well, as the newspaper Bingo erreulation war hots up and the group is still on target for John Menzies could not resist pretax profits of more than the bug and saw its shares drop £16m in the full year.

Interim Report The Directors of The Rugby Portland Cement P.L.C. announce that the unsudited Group

The results for the year to 31st December 1983 are an abridged version of the Company's full accounts for that year which received an unqualified auditor report and have been filed with the Registrar of Companies.

Although the U.K. Cement Group achieved relatively good increases in its sales tonnages these were not sufficient to offset the cost increases suffered. Rom River. Plasclip, following its reorganisation, produced a small trading profit.

The increase in overseas trading profits includes a £488,000 profit on land sales. by Cockburn and a 23% increase in their trading profits due to the continuation of the improved level of cament sales, together with record lime sales. Thece. increases were compounded by the strengthening of the Australian dollar.

Net interest includes the effect of the purchase of our one-third interest in R.C. Cement Inc. in June 1983. The related companies all benefited from higher sales tonnages, but the major

beneficiary of higher selling prices was U.S. Cement Inc. The second half of the year should produce a further improvement from Rom-River Plasclip, more land sales from Cockburn, the first contribution from the Addison Corporation acquisition, and the usual favourable seasonal swing in the results of the related companies, assisted by the continuing firming of their selling

The Directors have declared an interim dividend on account of the year ending 31st December 1984 of 2.9p a share - £3,494,124 (1983 - 2.7p a share £3,244,134).

The dividend will be paid on the 2nd January 1985 to shareholders on the register. ter on the 2nd November 1984.

Accountants brush up their image for TV

By Ian Griffiths

B' 'ger companies are unlikely to switch auditors on the basis of an advertising campaign

There is a famous sketch from the Monty Python's Flying Circus comedy team which features a frustrated accountant, Mr Herbert Anchovy, and his encounter with a vocational guidance counsellor. Mr Anchovy is fed up with being an accountant and wants to become a lion tamer.

The counsellor tells him: "Our experts describe you as an appallingly dull fellow, unimaginative, timid, spineless, easily dominated, no sense of numour, tedious company and irrepressibly drab and awful. And whereas in most professions these would be considerable drawbacks, in accountancy they are a positive

The sketch sums up an unfortunate image which the accountancy profession has somehow earned for itself. The idea that accountants are fearless, grey "number crunchcrs" has turned many people ancy firms are proving to be away from using their services. very good clients although one Until yesterday the profession is never too sure whether this Until yesterday the profession had no effective way of

countering this view, October 1 was an historic day for the accountancy profession. It signalled the relaxation of the strict ethical rules which govern practising accountants' ability campaigns will be mounted and

to advertise their name prod-ucts and services. Accountancy firms can now advertise nationally, in newspapers, on tele-vision and on radio.

Yesterday's newspapers were littered with advertisements by accountancy firms eagerly ped-dling their wares. Independent television viewers in the London and Scottish regions might also have caught a glimpse of the 20-second commercial from Deloitte Haskins and Sells.

The large firms will take fullest advantage of the relaxed rules. They, after all, have the financial resources to mount advertising campaigns of suf-ficient size to offer any chance of producing some tangible

This entrance into the mass media world has an air of the basis of an advertising adventure about it. The firms campaign or the offer of a set of are like small children going on free lable mats. are like small children going on a picnic. They are eager to get started but they do not know where they are going and they do not know if they will like what they have to eat when they get there.

For the the time being the firms are in the hands of their advertising agencies. For once, accountants have had to bow to a superior knowledge. According to the agencies, the accountsimply-means they do as they are told.

There is certainly as much interest among the advertising fraternity as there is within the

with what degree of success. The basic choice for the time Form being is between a corporate image building campaign and one designed to sell specific products and services to targeted markets.

At Coopers and Lybrand the initial thrust will be to create an image of the caring accountants who want to help businesses grow

Mr Brandon Gough, senior partner, explains; "Accountants are not really seen as being very business friendly. At this stage we will run a corporate campaign to put across the message that we are keen to help

The message is really aimed at the small and medium-sized businesses which have potential to grow. It is widely accepted that bigger companies are unlikely to switch auditors on

Coopers will be using national newspapers and are planning a TV advertising campaign to put their messag across. They will have watched Deloitte Haskins and Sells' commercial last night with great

unusual approach to their advertising in that in this first week it is very much a celebration of the relaxation of the rules. Both the TV commer-cial and the newspaper adver-is a suspicion that intense tisements explain that they have competition at the top end of been allowed to advertise for the first time before going on 10 highlight the range of services

the profession. wrong simply because advertising does not work for account-anis. No one knows what benefits there may be but the firms cannot continue to plough money into advertising without seeing any reward. They cannot it and their clients will not be happy at seeing their fees

frittered away.
The US experience, where

rise at Rugby ampaigns have little effect. Mr Pretax profits of Rugby Portland Cement rose from £10.7m to £11.6m in the half-year to June 30. The interim dividut is

Don Hanson, senior partner of Arthur Andersen, believes the same will be true in the UK.

He said: "We regard advertising as a relatively minor part of our total practice development

effort to give backing to our products and services. We don't think that image advertising is appropriate or even economically sensible. The relaxation will just allow us to communicate new developments that much easier and to make

contact with new people".

It will take time for the firms to assess how effective their advertising is and if, after the initial euphoria of liberation. some stabilization can be expected. It is apparent though, that a major thrust will be made by the big firms to lure small and medium-sized companies away from their present advisers. This will place the medium-sized accountancy practices under considerable

Without the financial resources to run their own large campaigns they will have to be more subtle in their approach. Many, such as Howard Tilly, will use public relations firms to e profession.

Mr Willott could be proved and this type of firm will rely on its special skills and quality of work to beat the challenge.

The medium-sized firms, and indeed all the others, will only hope that no one decides to take the approach to competitors of Mr Charles Revion, founder of the company of the same name, who said: "I don't meet competition, I crush it".

Surely such a dull and boring advertising was allowed for the profession could never first time eight years ago, capable of such latent demonstrates that massive gression? Or could it? ag-

TEET! Record profits bright prospects for the future

> PROFITS BEFORE TAX UP 81% TO £15.5M. **EARNINGS PER SHARE INCREASED 74% TO 14.59p**

Results for the half-year to 30th June, 1984

In the UK all activities produced improved results, in particular the minerals extraction, construction materials and brickmaking businesses. The new tilemaking plant is currently being commissioned, and the latest brick plant is on schedule. When completed, these projects will give significant

strategic strengths to the Company. In North America, the minerals operation produced excellent results.

The Australian Treasury gave its consent to the disposal of our remaining business there for some £12m which will reduce Group borrowings further. Improved results are now forecast for the French construction materials

business during the second half of the year. These results stem not only from an improvement in market conditions, but also from the major strategic restructuring of the Company over the past two years. They form

the basis of our confidence that there will be a material increase in profits for the year as a whole.

IBM expands facilities at **Portsmouth**

IBM is leasing 83,000 sq ft of warehousing and manufacturing space on the Interchange Park estate developed by Wilson (Connolly) at Eastern Road, Portsmouth, Hampshire, The computer company is believed to be paying a little under £2 a sq ft. The deal brings IBM's occupation at Interchange Park to 10 acres, of which the compnay has leased 177,000 sq ft over the past two years.

Wilson Connolly will not disclose the terms, but a break after three or five years in the 25-years lease is said to be the norm for IBM.

By Nicholas Harling Only tarely since the evolution of the National League can Crystal Palace have produced the surprising result of the first league programme by winning. It happened on Saturday when nothing, it seemed, not even the absences of Craig Robinson with a back injury, and John Moorehead with a twisted ankie, could prevent Manchester. ankle, could prevent Manchester, 39-32 ahead at the interval, from recording their first win over Palace

in It years.
Yet Paul Stimpson, the England captain and one of Palace's survivors from last season, scored points in an outstanding formance that contributed largely to his team's spectacular 93-

Of special delight to Stimpson must have been the fact that Dan Lloyd, his predecessor as captain to both club and country, finished on me duo and country, imished on the losing side, having just joined Manchester for a record £8,000 fee, Palace's two Americans, Seaman and Lucas, also scored 50 points between them, which augers well for their club's home Korac cup-tie, against the Dutch team Dem Helder lomorrow, morrow. Sperrings Solent stars, who play

Sperrings Solent stars, who play the big match in Europe this week, at home to Limoges on Thursday in the Champions! Cup, had little trouble recording their first win at Hemel Watford Royals. For two clubs who had lavished so much money on newcomers in the summer it was relatively low-scoring. Solent winning 79-62. Leading by 11 points at the interval, Solent were briefly stunned when Hemel-Watford fought back to within four points before they concreded 13 of /Watford fought back to within four points before they concreded 13 of the next 17. Three of Hemel's new signings collected 58 points between them but a fourth, Mike Spaid, could only get six points. He however, fared better than Drew Sewell, Hemel's, England International. In 17 minutes of court time Sewell failed to score.

Revenge: came muckly for

Revenge came quickly for Bracknell, who had been beaten by Worthing in the previous week's Kellog's Cup. the league fixture between the clubs went into two periods of over-time before Bracknell emerged 98-96; winners,

Rick Bontrager. Kingcraft Kingston's new player-coach, enjoyed the distinction of starting the season as the league's top scorer with his 40 pts at John Carr Doucaster, who mere always trailing. Davenport Birmingham would doubtless have given FSO Cars Warrington a better. game had they not lost Saunders; their effervescent guard, with a twisted ankle after only five minutes and Steve Assinder, with a badly cut and Steve Assinder, with a badly cut mouth that required three stitches only two minutes later. Four Leicester players got into double figures in their 107-84 victory over Home Spare Bolton, who seem likely to resume last season's struggles.

Tony Jacklin will have been the fact that, in the heat of relieved to learn that Severiano competition, some players have Ballesteros and Bernhard Langer shook hands following the final of the world match-play championship at Wentworth on

As captain of the European team which will meet the United States in the Ryder Cup next year, Jacklin is aware that a harmonious spirit is required if victory is to be gained. Such a spirit existed 12 months ago when spurred on by Jacklin's motivation. Europe came within one point of overcoming

the Americans in Florida. So, perhaps, it was surprising that Langer should point out on the eve of the final that he considered Ballesteros might be harbouring an aversion towards him as the West German was one of the three selectors that year who elected to leave the Spaniard out of the 1981 Ryder Cup.

Ballesteros, after beating Langer two and one, remarked:

The only thing that surprised me in 1981 was that Mark James was chosen, considering what happened in the previous match. (James was fined for his misdemeanours.) But that, too, does not mean that Mark is not a good player. Look how he won the Hennessy Cup for England two weeks ago."

Abilene (Reuter) - Curtis Strange struggled through the final 10 holes but staved off a fellow American. Mark O'Meara, and won the PGA's \$350,000 (£280,000) La Jet classic by two strokes by two strokes. Strange scored 71, one under par, for a 15 under par. His fifth win was worth \$63,000 and boosted his 1984 carnings to \$276.773.

O'Meara scored 275, six under par and finished second for the fifth

BOOK REVIEW

Activist celebrates end of struggle

includes essays on revolution and Trotsky in a book of selected articles, following up with "The revolution abandoned". This, then, no ordinary encket writer. This is L R James, political innovator in Marxist theory and working-class organization, activist in the events of his tıme.

The events have been numerous The events have been numerous, as have been his essays, for he is 83 and still working. He is the author of various books (yes, including one on revolution), the most fabled of which is Beauth in Biandary; written 21 years ago and generally recognized as the linest example of all excelst literatum Concessor are all cricket literature. Copies are rare. James calls his latest work . 11 the

Rendervous of Union (Allison & Bushy, £4.95, paperback), it is unclear what victory he is celebrating be it West Indies's independence, or human nature, or his own fulfilment. He looks forlors in the cover photograph, taken by Lord Snowdon, Perhaps, as E P Thompson suggests, "the clue (to his life) lies in his proper appreciation of the game of ericket".

In his formative years, two people lived in James: the rebel against all family and school discipline, and the Puritan, who would do nothing contrary to the ethics of the game. He grew up in Tunapuna, a small town barely discernible on the dusty

road leading to Trinidad's Port of Spain, He befriended Constantine, and later Worrell, lectured, taught, wrote, and threw himself into the struggle for colonial emancipation.

Whereas Beyond a Boundary took ricket as its theme, struggle is the thread in At the Renderwes of Fictory: A chapter is devoted to Kanhai – "an East Indian, and East Indians were still somewhat looked down upon by other people in the Caribbean" - and in particular one Canbbean" - and in particular one victorious innings of his, which embodied, says James, the West Indian quest for identity. "At that moment he could strike from his feet the dust of centuries. He was free as few West Indians have been free."

To follow James's thinking helps to have read Beyond a Boundary, and, of course, chapters preceding the one on Kanhai. He writes, for example, on federations: "I continue to believe that West Indies can only make progress by federation, a social change in which these diminutive Caribbean islands become at last a complete whole." There is a place for all at the rendezvous of victory.

ASIAN GAMES: The Japanese city of Sapporo will host the first winter Games in 1986. The summer CRICKET

Australia's hopes vanish in the rain

Trivandrum, India (AP) - The-second Australia-India one-day, international in the current fiveinternational in the current rec-match series was abandoned yesterday after monsoon rains' washed out play early on during the visitors' reply to India's 175 all out.

More than 15,000 spectators packed Trivandrum university stadium to watch the first international played in the picturesque coastal city. The match, scheduled to start at 9.30, began 40 minutes late because of overnight showers. It was finally decided, after a dispute between the rival captains, that each side would then play 37 overs

The Australian captain, Hughes won the toss for the second time in the series, and put the home side in to bat on a soft wicker that helped the fast bowlers to move the ball. India began pourly, and were particularly uncomfortable against Rackemann, who cut the ball both ways and claimed three wickets for seven runs in a spell of eight overs. Tall, lanky Dilip Vengsarkar helped to stem the Indial batting collapse with a swashbuckling 78.

Scottish clubs may lose points

The Scottish Football Association have recommended that two premier division matches which were marred by crowd violence should either be replayed, or that Rangers and Heart of Midlothian should forfeit the points. forfeit the points.
The SFA disciplinary con

mittee announced their shock indgment after studying reports into a pitch invasion during the Edinburgh derby between Hibernian and Hearts on August 24, and the incident two weeks later when the Hibernian defender. Kevin McKee, was assaulted by a supporter during the league match against

Rangers at Ibrox.
Now the Scottish League will have to decide whether to endorse the SFA's recomin dations at their next management committee meeting, in Giasgow on October 18, or mpose less stringent penalties

The SFA have actively pursued a campaign to stamp out football hooliganism this n and the secretary, Ernie Walker, said: "The committee is in no doubt that the intrusion of pectators in both games affected the match - or was an attempt to affect the match. In

attempt to affect the match. In those circumstances, they recommend that the Scottish League invoke Rule 82 and require these matches to be replayed, or that they should deduct points or a point from the offending clubs, Rangers and Hearts.

"If they should decide to do that, the SFA would give their full backing to this decision, and the SFA itself invoke its own similar rule should any such conduct of interference arise at Scottish Cup or qualifying cup

Pat Stanton, who resigned as manager of Hibernian two weeks ago, has been fined £500 and banned from the dugout for a year. The FA imposed the penalties following an incident where he was ordered into the stand during the premier div-ision game between Aberdeen and Hibernian on September 1. The Kilmarnock manager, Clunic, once Lawrie assistant at has resigned.

On target: Glenn Hoddle displays all his familiar shooting power in scoring for Spurs reserves in the 5-1 win over Swindon in the Football Combination at Cheshant yesterday. Like Hoddle, Ardiles also came through the game without mishap.

QPR's riches beyond the Icelandic fish bar

Queen's Park Rangers and Everton are like pirates who upon opening the treasure chest found opening the treasure chest found only a map directing them to another chest. They will find none of the riches that they were promised in European competition tonight but at least they seem securely on the trail of the treasure.

Rangers and Everton can expect Rangers and Everton can expect

Rangers and Everton can expect to attract only the hard core supporter and the curious to their first round second leg ties against Reykjavik and University College Dublin, respectively. Rangers believe thay will attract about 8,000 spectators, 3,000 less then they would have done had the match been at Lofter Road Recase of the been at Loftus Road. Because of the UEFA ban on their artificial pitch Rangers will be playing at Highbury

who scored two goals in Reykjavik, doubtful. Stewart will play and incurred stand to make only a "small profit". At least Everton can Charles is on standby.

"small profit". At least Everton can draw on the heavy Irish contingent in Liverpool. All the area of Highbury has to offer in the way of support for the visitors is an Icelandic fish bar in Archway Road. Rangers lead 3-0 from the first leg of this UEFA Cup tie and have done their best to sell the second leg even Everton will want to crase the professional embarrassment of the goalless draw in the first leg of this Cup Winners' Cup tie. The fickle Curren, sent off in the last minute at Curren, sent off in the last minute at Watford on Saturday is retained, Howard Kendall, the manager, will consider disciplining him when he has read the referrer's report. Sheedy and Gray are unfit. Kendall said: "Our failing last time was probably that we didn't show enough imagination." their best to sell the second leg even their best to sell the second leg even if there appears to be some conflict in their, promotion angles. Alan Mullery, the manager, has promised a goal bonanza, and Ron Phillips, the secretary, tells us that the result is not a foregone conclusion. The best one can say is that Rangers' form of late is a trifle erratic. Ankle injuries make Micklewhite, an ever present, unavailable, and Stainrod,

Gordon Strachan, Manchester United's penalty midfield player, is out of the second leg of the EUFA Cup first round match with Raba Vasas Gyoer in Hungary tomorrow.

Brian Glanville

On thing is certain about the latest Italian bribery scandal: it will have no sequel. These things never do. Since EPOCA, the Milanese weekly magazine, alleged that the Cameroon were paid 100,000 dollars (£80,000) to let Italy draw their 1982 World Cup game 1-1 in Vigo, much circumstantial evidence has emerged. Orlando Moscatelli.

has emerged. Orlando Moscatelli.

Swales in move to Managers in demand

off of forner England forward Peter Withe at Ipswich last Saturday. Withe was sent off for allegedly making an obscene gesture to a linesman, but Villa are claiming he was the victim of mistaken identity and that Paul Ridcout was the real offender. Both players are to write to the FA giving their versions of

Skelton and Radius on the right lines

illustrious equestrian careers ever. As the Olympic dressage was minimally covered by television, his appearances at Wembley ou Ahlerich, give a rare opportunity to watch this once in a lifetime restricted. The Everest stud in Warwickshire nade a fine start to the Horse of the Year show at Wembley yesterday when Nick Skeiton and Everest Radius won the opening Dick Turpin Stakes and Geoff Luckett. who joined the yard last November, finished third on Everest Arabeske. In between came Geoff Billington, age 29, from Cheshire, with the consistent J.R. IV, a winner at Park

consistent J.R. IV, a winner at Park Farm last week.
Everest Radius, who had a year off after breaking down at Gotheri-burg in 1982, has been placed consistently since his return to the circuit. Yesterday he and the outstanding Skelton, who is 26, won with cunsumate case, finishing more than two seconds ahead of Billington.

the pink.

It was a match full of splendid recovery shots and complicated escape routes but few brilliant pots. Overall, the South African made better use of his opportunities although, as he admitted, "I should not have lost the first frame". It was snatched from him by Virgo who potted the last three balls to win on the black after Francisco had been snookered on the blue.

Francisco has not so far stepped than two seconds alread of Billington.

Michael Whitaker, whose Olympic horse Amanda was rushed to the Royal veterinary College in Potters: Bar with suspected colic at the weekend, said the ten-year-old mare, was making a steady recovery after an operation for a displacement of part of the bowel.

Now in need of another grand snookered on the blue.

Francisco has not so far stepped beyond the quarter-final round of any important tournament but he now hopes that the golden gates have been opened for him. He started his recovery yesterday with a break of 45 in the second frame, won the third with a clearance of 80 and then went into the interval with a 3-1 lead.

part of the bowel.

Now in need of another grand prix horse to fill the gap, Whitaker has been offered the ride on one of Tony Elliott's horses, either Pavarotti or Rio Grande.

One of the highlights of this year's show are the dressage displays given by Reiner Klimke, the West German rider, whose two gold medals crowned one of the most

Salford to appeal over sending-off

Meo 5-1.
Yet another surprise was provided on Sunday when Ray Reardon, ranked number five in the world, was beaten by the unfancied Irishman, Engene Hughes. In the evening, Willie Thorne beat Marcel Gauvreau, of Canada, 5-3. Thorne was leading 4-0 and was 45 points to the good in the fifth frame when an element of carelessness crept into his play. Gauvreau won the next three frames before Thorne won with a clearance break of 73.
SECOND ROUNDS Davis to Basid Taxion. 5-1: The sending-off of the Salford brushes with second row forward, David Major, against Bridgend on Sunday, was "a clear case of mistaken identity", Australian and Australian and according to Salford club officials and they are to appeal to the League's disciplinary committee.

Major received his marching orders early in the game when a touch judge intervenced following a tackle which laid out the Bridgend loose forward, Gordon Pritchard. Major protested his innocence at the time, and members of the crowd and reporters at the match who had seen the incident were equally bemused, believing that the offending player was an experienced. ing player was an experienced forward who had had previous

Swinton hope to include an Australian and a New Zealand Maori in their reserve team game against Salford on Sanurday. They are the speedy Maori half back, Wayne Rutene, who has previously played in this country for Widnes, and the forward from Manly, Ian Thomson. Swinton have now ended their Interest in a possible player exchange between their own second row forward Jeff Brown and the Fulham utility player David Allen.

ABA sponsorship George Wimpey will continue their sponsorship of the Amateur Boxing Association next year.

LTA refuse to blame Hutchins for defeat

By Rex Bellamy Tennis Correspond

Britain's national team manager since 1975, said yesterday that he was "in the middle of negotiating" a new two-year contract offered to him a few weeks ago by the Lawn Temais Association. "I have told them that in principle I will accept it," be added, "but there are a few things to sort out."

sort out."

Hutchins's present contract will stopice in February. Previous renewals of his contract have not aroused mach comment. It has only become of interest now because of the tendency to search for a scapegoat after Yagoslavia's 4-1 win over Britain in a Davis Cup tie at Eastbourne last week.

Rather than criticizing the manager, perhaps we should note that Britain's singles were lost by John Lloyd, who has an admirable doubles record, but has won only 12 of his 30 Davis Cup singles, and the inexperienced Stephen Shaw, a newcomer to the team. Hutchins is primarily responsible for selecting and managing national teams from limited and often fragile resources. The task of strengthening those resources is one he shares with the LTA as a whole.

Sue Mappin, who has been the women's training organizer and national team manager in turn since January, 1979, will finish her second three-year contract in December, but is willing to accept another, similar contract. "I want to finish the job I was employed to do," she said yesterday, "As far as I can see, what I'm doing is working."

(Renter) — Sweden and the United States completed comfortable Davis Cup semi-final victories at the weekend to set the stage for an intriguing final in December, spearheaded by John McEuroe, the Americans overcame 1983 cup winners Anstralia 4-1 in Portland, Oregon, while Sweden swept in an even more impressive 5-0 triumph over Cachoslovakia in Baastad.

Sweden and the United States last met at the quarter-final stage in St Louis in 1982 when McEuroe was the American saviour with a menorable 9-J, 6-2, 15-17, 3-6, 8-6 win over Mats Wilander in the decisive fifth and final rubber.

So although Sweden have wen the trophy only once — under the inspiration of Bjorn Borg in 1975 they will not be overswed by the United States' record of 28 Davis

Dundee look doomed to cup failure

By Robert Pryce Dundes Rockets' European Cup Durates Rockers European Cup campaign threatens to be as brief as last season's. "We're behind," their player-coach, Roy Halpin, says. And the first game is not until Thursday. Although the British season started earlier than ever this year, and the Rockers have once again undertaken extra training at the hands of Dundee United's coaching hands of Dundee United's coacing staff, Halpin is concerned about their lack of conditioning. At Kirkaldy on Saturday they allowed a 7-3 second period lead to disintegrate into a 10-3 defeat, in Megère high in the French Alps, they face a team that have been in training most of the number and training most of the summer and will have

most of the summer and win have much greater strength in depth than any club they are accustomed to facing this side of the Channel Halpin and Roch Bois scored two pals each as Dundee seized a 7-3-lead after 26 minutes of their Autumn Cup (sponsored by Bine-col) game against Fife Flyers. But the Kirkcaldy learn are now a far different proposition from that of recent seasons. They scored power-play goals in the last minute of the period and had recovered to 7-7. period and had after 46 minutes.

after 46 minutes.

Fife's imported players are of a pedigree not seen in this country since the 1950s. Their new player-coach, Ron Plumb, played nearly 600 games at the highest level in North America – for Hartford Whalers among other treams – and is still only 34. "He's not a flashy player", Hafpin says, "but he gives them something they haven't had – a defence man who can bring the puck out of their end zone under puck out of their end zone under

The word is already out in Kirkcaldy, where more than 3,000 spectators voiced their delight with the result on Saturday.

MOTOR RACING

Renault call off their attempt to sign Lauda

Paris (Reuter) - Renault have abandoned thoughts of signing the abandoned thoughts of signing the world championship leader. Niki Lauda, and will rely again on Patrick Tambay, of France, and Derek Warwick, of Britain, next season, the French Formula one motor racing team said yesterday.

Lauda confirmed the news saying: "There is no question of my going to either Ferrari or Renault." Although Lauda has said he will not make his final decision on who be will drive for until after the season finishes in Portugal on October 21, it seems probable he will stay with McLaren. Renault have also decaded to enter a third car for the Fortuguese Grand Prix on October 21 to be driven by Philippe Strent of France, A spokesman added that the fuel problems which beset Renault earlier this season had been solved, and the cars would have complete electronic injection for the first time in Sunday's European Grand Prix

Wasps, as they did last year, - University players who will be

Winterbottom, the England Winterbottom, the ringiano flanker, also returns to the side which has Underwood on the left wing. The Leicester player, who scored a try for England against the President's XV on Saturday, will be unavailable for club, county or country for the first six months of next year The Barbarians, who play Newport at Rodney Parade this evening, have been forced to make two changes to their original side owing to the unavailability of the two Irish players Fitzgerald as hooker and Lenihan at lock. Newport, their minds perhaps looking ahead, were swamped 39-10 by Llanelli at the weekend, but will have Watkins their captain back to

keep them on course.

Two Scots who played such significant roles in their country's grand slam last season, have been honoured by the Rugby Union Writers' Club: Aitken, the captain, is person-ality of the year and Jim Telfer, the coach, is acknowledged as being the season's outstanding contributor to the game as a

YACHTING

Challenge battles on two fronts

By a Special Correspondent Porto Cervo

An interesting battle for a place in the .12-metre world championship finals is developing between Victory 83 and Challenge 12 Both yachts won their matches yesterday, Victory 83 against Freedom by over a minute, and Challenge 12 against France III by nearly four minutes. Victory 83 and Challenge 12 are both in 4 Division, and stronly one Victory 83 and Challenge 12 are both in A Division, and so only one of them can make it to the final. However, in B Division, Azzurra is assured of a place in the final. Canada, I and New Zealand, were in this division, so her only competition is Gretel 2, and Azzurra elements there a transport here. already has a two-race lead.

already has a two-race lead.

Whichever of the two yachts from
A Division makes it to the final, it
will be a predominantly Italian
series, both yachts are now owned
by Italian syndicates and are
representing Italian yacht clubs, but
both have non-Italians in key
positions. Victory '83 has the
American, Rod Davis, a formidable
match racer, as tactician. Challenge
12 has six Australians out of a crew maten racer, as racucian. Chautenge 12 has six Australians out of a crew of 11, and this event is of particular importance to the two men sharing the helming, John Savage and Hugh Treharne, as one of them will be chosen to lead Alan Bond's defence of the Austrice. of the America's Cup.

Curtis masters opposition and conditions

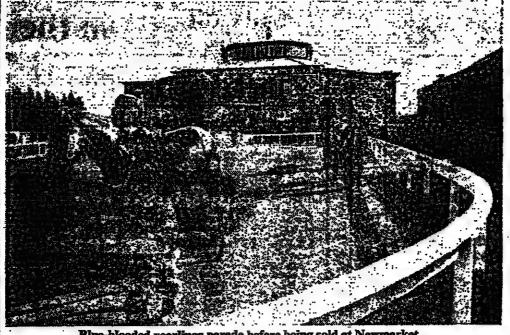

By-John Nicholls ... David Curus, from the United States, overcame trying conditions to win the first race of the J24 world championship in Poole Bay yesterday. Primarily a Soling sailor, as are several of the other competitors. Curtis moved smoothly into the lead after rounding the first mark in fifth place. The weather was autumnal at best, wintry at worst, with much rain and a chilly, easterly

The J24s seem popular boats for chartering or borrowing and for having an invited helmsman on having an invited fictinism on someone class's boat. A large proportion of the 51 entries are british based, but carry sail numbers from as far away as Australia and Peru Curis, however, brought a boat with him and no doubt his familiarity with it helped on a day when boat speed and expertise in handling were vital.

expertise in handling were vital.

Two general recalls were necessary before the fleet started cleanly and even then one of the Irish entries fell foul of the race committee's beady eyes and was disqualified. The first windward leg proved to be decisive and boats that chose the port size of the course were well placed at the first mark. The well-sailed ones remained in contention, led for the first round by Mike Hobson's British entry Out of Sight. Sight.
She was never that far ahead

She was never than har aneau, unfortunately, and had slipped to second behind Crispin Read-Wilson's Interbug, another of the 15 British boats. Curtis was now third, having overtaken Ed Baird, Edward Warden Owen, three times the British champion, was placed twelfth, having gained many places after a poor first leg.

Blue-blooded yearlings parade before being sold at Newmarket

Burns colt could break record

The bloodstock world's equivalent to Derby Day holds the international centre stage today when around 25 million guineas are expected to change hands during the select session of the Newmarket Highflyer Yearling Sales.

The now familiar bidding duels between Robert Sangster, Khaled Abdulla and the Maktoum family will be resumed by their respective against and there are a number of choicily-bred coits who could break the Europeann record price for a yearling sold at auction.

The record was set on the corresponding day last year when Robert Sangster paid 1.550,000 guineas for a Hello Gorgeous colt, will come under the hammer today.

Kris. who could be making

Draw: High numbers best.

GOING: straight, good to soft, round good.

2.30 FEDERATION OF SUSSEX INDUSTRIES HANDICAP (£2.947: 1m)

FORM: TRAPEZE ARTIST (8-7) lest of 5 to Young Turk (8-7) in Weish Derby, earlier (8-5) 51 winner from Rough Pearl (8-10) et Chester (1m 4f, £3630, good to firm, May 9th, 12 ran). LYNAION (7-9) in the rear behind Lisadourn (8-1) at Newbury (1m 5.57), earlier (9-0) best Broadlerf (9-0) 17-1 at Selektury (1m 4, £776, good to soit, June 6, 15 earlier (8-7) best Broadlerf (9-0) 17-1 at Selektury (1m 4, £786, good 5 earlier (1m 4, £786, good, Sep 14, 8 mm). AT YARF (8-7) bestind July Hide (8-12) at Rectar (1m 2f, £2755, good, June 23, 5 mm). BQSSANOVA BOY (9-11) 17-11 and to Amber Heights (9-5) at Ayr (1m 5f, £2363, good, June 23, 5 mm). SARAIT'S VENTURE (9-2) best Going Going (10-2) comfortable 27-11 at Selection: SARAIT'S VENTURE (9-2)

The bloodstock world's equivalent to Derby Day holds the international centre stage today when around 25 million gnineas are expected to change hands during the scient session of the Newmarket Highflyer Yearling Sales.

The now familiar bidding duels between Robert Sangster, Khaled Abdulla and the Maktoum family will be resumed by their respective against and there are a number of copy of two-year-olds in 1984 are choicelly-bred colts who could break the sum of the Newmarket and the maktoum family will be resumed by their respective and his respective and Nurveyev. The latter's morning.

Among those sires represented by their first crop of yearlings, are Shergar (one colt, three fillies) and King's Lake (six colts). The Select Sale averaged 157,579 guineas. last year and this figure looks sure to be bettered today. Part two of the sale runs from tomorrow

partnership.

Paul Eddery, Piggott's understudy at Warren Place, rode Millbow at Goodwood, and through no fault of his own found himself with nowhere to go when he brought the Mill Reef colt to challenge the leaders with about quarter of a mile left to run. Millbow was full of running at this point, but Eddery had to switch him round his rivals and once he found daylight Ivano had gone beyond millbow finished fast to be beaten a length and a half and a neck by the

Millbow finished fast to be beaten a length and a half and a neck by the winner and Daleside Redwood. Ivano did not do the form any harm when finishing third to Sarab in a good-class race over the same course yesterday. Before that Millbow, who was once regarded as having classic potential, had been an easy winner from Sugar Pahm at Brighton. "Millbow's principal rival is likely to be the year old Parliament, who after good runs behind Adonijah at Sandown Park and Macarthur's Head at Newbury beat Millbow's stable companion, El Hakim over loday's course last month and is clearly a decent colt. However he has proved none too consistent and it may be worth taking a chance with Tickty Bender, who finished just over four and all lengths behind Great Reef when they were third and sixth in the Lanson Champagne Stakes over the course and distance in August and is now 6lb benter off.

In theory that is not enough to turn the tables, but the stable of Robert Armstrong, his trainer, is just beginning to run into form and Tickty Bender had earlier looked a useful individual when winning at Newmarket on his debut and subsequently finishing a vey and Make Strides (Exton Park

Today's course specialists

Piggott can swoop on unlucky Millbow

Millbow, who was extremely Stakes). However, both may find unlucky when third to Ivano at one too good for them in Dame du Goodwood in his most recent run, is Moulin and Classic Capistrano, napped to win today's Bentinck Stakes at Nottingham and provide the Henry Cecil-Lester Piggott disappointing combination with another success in the dying weeks of their prolific

GOODWOOD

TRAINERS: J Tree 11 winners from 47 runners, 23.6% G Harmood 45 winners from 204 runners, 22.5%; J Duniop 28 winners from 218 runners, 12.8%.

JOCKEYS: G Baxter 14 winners from 74 rides, 18.9%; P Eddary 41 winners from BAZ rides, 16.9%; P Cook 17 winners from 117 rides, 14.5%.

Dame du Moulin was a little

disappointing when fifth to Clasic Capistrano here last month, but had earlier finished third to the brilliant

All Along's workout impresses

From Desmond Stoneham Paris

Biancone

Darshaan has been announced a non-runner for next Sunday Prix de l'Are de Triomphe, Speaking from his Chantilly stable yesterday morning. Alain de Royer-Dupré, the trainer said: "Darshaan is finished for this season but his future is still not decided. Following his gallop last Friday I was not convinced that the horse was back to his best. Certainly the trip to England for the King George took a lot out of him.

Mre Are preparations were
completed at Chantilly this mora-

ing Patrick Biancome galloped last year's big-race herome All Along (Eric Legrix) with the Australian hope, Strawberry Road (Robert Jallu). Biancone said after the workout "That was fantastic and I reckon that Ali Along has come on 150 metres since her gallop before the Turf Classic." In that grade one American race the mare finished fourth to the all-conquering John Menn!

Henry.

John Nicholls was also delighted with Strawberry Road who finished up alongside All Along. The Australian trauner said of his five-

Australian trainer said of his five-year-olds "That was a perfect warm up for the ARc. Strawberry Road will adore the ground if it is soft." Esprit du Nord who limished a short head second to Strawberry Road in the Grosser Preis Vod Baden, finished his preparation over a mile and half at Chantilly racecourse, A beaming John Fellows said after: "I've never known him work so well and he could not have blown a candle out after his gallop." Stanerra the brilliant Irish mare, will miss the Arc. Brian Rouse, who was to have ridden her, said: "I'm afraid she cut a hind leg in a gallon at Leopardstown on Saturday."

OUP LEGAL

OUTSTANDING OPPORTUNITY FOR A YOUNG LAWYER

BRIGHTON BASED

Ewbank Preece is one of the world's leading international consulting engineering groups, working for a diverse range of substantial clients in the power weter, oil, telecommunications and industrial fields.

This key senior appointment offers exceptional scope to a young lawyer around 30, capable of providing a full range of legal services to our widespread UK and overseas operations. Responsibilities will include commercial contracts, joint ventures, personnel

legislation, general legal advice to management and the Group's pension and insurance arrangements. There is a small supporting staff.

Candidates must be able to demonstrate a good academic record followed by qualification as a solicitor or barrister. Some years' experience in a similar role will be looked for possibly as Assistant Legal Adviser in a large organisation. A willingness to travel overseas is essential.

Please write, in confidence, with concise, relevant career history to: C, P. Barnard, Director of Personnel, Ewbank Preece Ltd., Prudential House, North Street, Brighton BN1 1RW.

Ewbank Preece Limited -

Holland Chemical International Ltd.

Corporate Legal Counsel Amsterdam

Holland Chemical International, Ltd. is a private company registered in Bermuda specialising in the shipping, trading and distribution of a wide variety of chemical products. The Group's financial and legal centre is located in Amsterdam.

The Company is looking for a lawyer, either a solicitor or a barrister, with at least three years' post qualification commercial experience. The successful applicant will be responsible for maintaining over 70 companies in the HCl Group, including the Bermudian parent, and will report to the Directors of the Company on matters relating to group financing; corporate acquisitions, and other related commercial matters.

Since much of the Company's business is based in Latin America, the successful applicant must speak Spanish and must be prepared to travel extensively to countries in Latin America, the United States, and Bermuda.

Applications are invited from young lawyers wishing to gain' experience in the field of international commerce and finance. Remuneration will be above the market rate and will include the usual international company fringe benefits. Relocation

expenses will be met in full by the Company. Applications containing a full curriculum vitae should be addressed to:

ાં છે છે છે

High Technology Company c.£13,000: West of London

A young lawyer is required to provide professional legal support to scientists and engineers engaged in research and consultancy for the marine, offshore, civil engineering and aerodynamic engineering industries.

The principal responsibilities are contract drafting and negotiation and insurance management. You must, therefore, be fully conversant with contract, tort, intellectual property and insurance matters. In addition you will provide advice on employment law, conveyancing, litigation and general business law and act as Company Secretary of our subsidiary. Your legal skills should be combined with a commercial awareness which enables you to make a practical contribution to commercial negotiations and discussions, frequently as part of a multi-disciplinary team.

The post will be suitable for a young solicitor or barrister with at least one year's post qualification experience, or a law graduate with substantial experience in the legal

NMI Ltd was formed in 1982 by the privatisation of the National Maritime institute which was formerly part of the Department of Trade and Industry. The headquarters of the company is in Feltham, Middlesex.

In addition to the salary quoted, the company provides a low cost pension scheme, permanent health insurance and a subsidised staff restaurant. Please write, with full career details to Miss Claire Miller, NMI Ltd, Faggs Road, Feltham,

MAKE SURE AA MEMBERS DRIVE ON THE RIGHT SIDE OF THE LAW

The services of the world's largest motoring organisation don't stop with our famous roadside assistance. Members are also able to obtain a range of other services, including free legal advice on all aspects of motoring law, free legal representation in Magistrates Courts relating to motoring offences, and Claims Recovery Service.

Due to internal promotion a vacancy has arisen for a Legal Advisor in the Legal Department at our Regional Headquarters in Twickenham. The successful applicant would be expected to

advise AA members over the telephone and by correspondence on all legal problems arising from the use and ownership of motor vehicles and, in certain cases, negotiate on their behalf.

The work is predominantly concerned with contractual law, hire purchase, tort, motor

insurance and motoring law generally.

Applicants should have the following knowledge and experience: a good knowledge of motoring law and an ability to communicate effectively likely to be found in a person with either:

a) a minimum of 7 years' experience in motoring law, or b) a minimum of 3 years' experience plus a law degree, or working as a Legal Executive, however Barristers and Solicitors can also apply.

This varied and interesting post carries a commencing salary of £7,977 (including London Weighting), and will attract the full range of AA benefits.

For an application form, please telephone the Personnel Department on 01-891 4172 quoting ref; 3673.

ROWE & MAW COMMERCIAL LITIGATION

Rowe & Maw seek applications for newly - or recently - qualified Solicitors to join their expanding Litigation Department. The successful candidate will have a good academic background and be expected to handle High Court litigation and arbitrations arising. principally, but not exclusively, from a variety of building and civil engineering disputes.

Please write with a full curriculum vitae to:

Mr A. J. M. Blackler, 15 Devereux Court, Essex Street, London WC2R 3JX

********** CHARLES RUSSELL & CO

A Commercial Litigation Solicitor (preferably qualified at & least 3 years) for insurance litigation. The job, which is a new & one, will involve an initial period of secondment for at least 2.

* one, will involve an initial period of secondment for at least 2 * years to a client company.

* The client, a small privately owned insurance underwriting * and Lloyd's Broking Group, has offices in EC3 and * administrative headquarters in Marlow Buckinghamshire. * The secondment will be in Marlow but will entail close * liaison with and frequent travel to the firm's offices in * Lincoln's Inn. During the period of secondment, the * successful applicant will initiate and deal with reinsurance * recoveries and other claims generated by both the broking * side of the clients business and by its expanding insurance * portfolio run-off operations. Administrative skills and some * knowledge of computer procedures would be an advantage. * A competitive salary will be paid and during the period of * secondment a motor car will be provided.

Apply in writing with CV to: CHARLES RUSSELL & CO Hale Court, Lincolns Inn, London WC2A 3UL (Reference V) ********

CHOICE

 There are two high-quality movies tonight with performances that give the lie to the grouse that they don't write good parts for women any more. Sally Field, who plays the campaigning textile worker in Martin Ritt's NORMA RAE (BBC 2, 9.00pm), won both a Hollywood Oscar and the Best Actress award at the Cannes Film Festival. And Vanessa Redgrave is seen at her considerable best in Marvin Chomsky's MY BODY, MY CHILD (Channel 4, 9,00pm), • GEMMEL'S GARDENS (Radio 4.

9.30pm) knocks for six the hoary saw that the last bastion that television can guarantee to defend against the depredators from steam radio is the gardening programme, i.e. one picture is worth a thousand

Radio 4

words. I would not go so far as to say that one of Professor Alan Gemmel's words is worth a thousand pictures, but when you listen to the first in his new BBC Scotland series tonight, you will be delighted with the intensity of the pictures of natural and cultivated beauty that this veteran broadcaste

paints as he wanders through the 40 acres of woodland gardens at Crarae, on the shores of Loch Fyne. Professor Gemmell's secret is not to be sugary about nature, or too reverential, or over-postic. What he has is a sense of wonder. And a sense of humour. Though the rowan tree is reputed to be good for keeping witches at bay, he says, the one he planted at the gate of his house did not repel his mother-in-

Gun run ship may not know of swoop

The guaranning "mother ship" which offloaded a large arms cargo destined for the IRA may still be unaware that Irish naval forces swooped and seized the weapons. It is believed that an

internationally owned satellite was used to jam the ship's radio network. Irish police and the FBI are still refusing to name the vessel, which is Canadian-

It left New York a few weeks ago and contacted the Co Kerry trawler Marita Ann 200 miles off the west coast of Ireland. The ship's movements in the Atlantic were still being monitored closely last night. Security sources in Dublin said the vessel may have been carrying other stocks of arms for various

terrorist organizations.
Sources at the marine rescue coordination centre at Shannon confirmed that it would be possible to jam the Canadian ship's communications net-work. But a spokesman said: "I cannot say any more than

As the weapons cargo was moved from Cork to police adquarters in Dublin yesterday for forensic examination a police spokesman said: "This is an international matter. We would not be playing ball to name the ship."

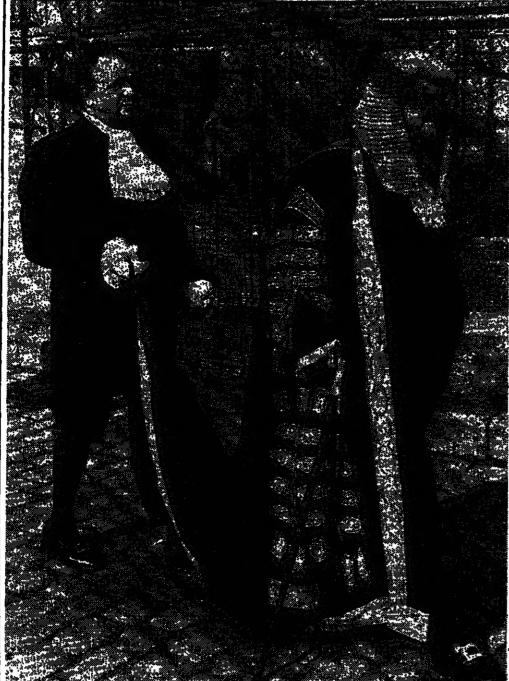

A full report of the seizure, which followed united action by which followed united action by
the FBL, British Intelligence
and Irish security forces, was
given to the Dublin Cabinet
yesterday by Mr Michael
Noonan, the justice minister.
Mr Patrick Cooney, the defence minister, is in Lebanon.
The refusal of the Dublin
purborities to name the Cons-

anthorities to name the Canadian vessel fuelled speculation that the skipper and crew may still be snaware of the seizure. The Canadian ship is not being sought officially by Irish security police because it offloaded the cargo in inter-

Five men have been charged with possession of guns and explosives after the seizure. Six others detained in swoops by special branch officers have

 The arms haul seized from the Marita Ann included rifle night sights which would have given the IRA 24-hour attack capability for the first time, it was learned yesterday. Most of the other weapons discovered after the vessel was intercepted off the Co Kerry coast have been seen in Northern Ireland.

The power and the glory

Lord Hailsham of St Marylebone, Lord High Chancellor of Great Britain (left) leading the annual procession of judges from Westminster Abbey to Par-liament to mark the beginning of the legal year yesterday. The service at the Abbey dates from the Mid-

dle Ages and has its roots in the religious practice of judges praying for guidance. Afterwards, Lord Hailsham entertained the judges to a "breakfast" (a light buffet huncheon) in the Royal Gallery of the Houses of Parliament (Photographs:

to Kinnock pits pressed proposal

pledge support, but with differing degrees of support in mind.

Mr Ron Todd, of the transport workers, and Mr Ray Buckton, of the footplatemen, were obliquely critical of the less-than-wholehearted support from unions in the power industry.

But the more enduring danger for Mr Kinnock's leadership may have lain in an earlier debate in which Mr Arthur Scargill took the conference by storm with his appeal for support for the miners' "historic struggle".

Half of the conference, though not all, was on its feet applauding before Labour's man of the hour had reached the rostrum, and the cheers came whenever he raised his

winning this fight and they're picket lines would be abolished not only winning it for miners.

• More than 60 Nacods pit they're winning it for you, he told the party. told the party.

The core of Mr Scargill's straightforward. There were no uneconomic pits, he said. There were only pits that had been starved of investment by

Dod Miller. Labour 'No' Initiative on by Orme

Continued from page 1 process point to a fresh attempt

to bring the miners and the board back together again. The issue at stake is still the same: the NUM's refusal to accept the closure of "unecon-omic" pits and the search for a mutually-acceptable definition of what is an "exhausted" pit Mr Orme said last night that he had put forward certain

propositions to both sides, after which the NUM had argued that they would be a basis for negotiation During four hours of talks with the board in London

yesterday Nacods leaders pressed the union's suggestion for a revised colliery review procedure and agreed to further talks today.

The board had earlier accepted that guidelines govern-

 More than 60 Nacods pit deputies walked out on strike yesterday from the militant Mardy colliery in South Wales.
Mr Charles Williss the Nacods area president said:
The men feel they were misled. by their leaders as they thought the ballot vote would lead to immediate industrial action."

Frank Johnson in Blackpool

Soaring on clouds of adulation

Mr Arthur Scargill, address-ing the first day of the Labour nce to tumultuous acclaim yesterday, said:
"We've got food kitchens
stationed in our villages.
We've had 3,000 miners

injured. That's the reality."
He was drawing attention to an aspect of the miners' strike which has been widely over-looked. The sheer fun of it! A child of the affluent Fifties and Sixties, a fact readily deducible from his compulsive use of the bloom down Mr. Scarpill of the blow-dryer, Mr Scargill had believed in that era that he would never live to see the day when soup kitchens, and miners injured from tangling with policemen, would once again be a feature of mining village life.

Until the 1970s, and his own fame, exciting miners' strikes were things which he could only read about in the history books. Almost singlehandedly, he had proved that Britain could still have real industrial disputes in the latter part of the twentieth century. Life in those "tightly-knit mining communities", about which we hear so interminably, must have become in reality extremely boring -much pigeon racing and male chanyimism, very little gay

By following Mr Scargill, they had proved that life could be as poignant and dramatic as it was for their forebears. The Labour Conference yesterday, was, I suspect, as grateful for the fact as many in the mining communities themselves. He rose and sat down to tremendous roars. For them, he was the deliverer from decades of unromantic Gaitskellite and Wilsonian managerialism. People like Mr Roy Hattersley, who, for some unaccountable reason is the deputy leader, looked out of it. Several times Mr Scargill's speech was interrupted by thunderous applause. Like all the practised orators in the movement - Mr Benn uses the same tactic too - Mr Scargill knew that the thing to do, when applauded in midspeech, is to carry on orating. This gives the impression that the orator is soaring through clouds of adulation. And when he stops and leaves the

the greater. Mr Scargill received par-ticular acclaim when in denouncing the idea of a miner accepting redundancy payments, he shouted: "It's

rostrum, the applause is all the

not his job to sell" Mr Scargill always receives especial approval when making this point at conferences. Sometimes he

at conserved. Sometimes he adds that the job is not just the miner's, but his son's, too.

Some of us have never quite understood this point. As far as one can grasp it, it is a defence of the hereditary principle the principle which defence of the hereditary principle – the principle which Mr Scargill's ally, the then Viscount Stansgate, undermined a generation ago by forcing an end to the rule that peers could not renounce the presence of the property of the principle which we have a property of the property of the property of the principle which we have the property of the principle which we have the property of the prope peerages. In yet another shift to the left, Mr Benn, on the platform yesterday, applanded vigorously.

Naturally, the conference voted support for Mr Scargill's tremendous struggle to en-liven existence in the tightly knit communities.

Next, a debate on violence. The conference decided over-whelmingly that violence was someting indulged in by the police. Mr Ron Todd, the new leader of the Transport and General, broadened the argument by admitting that there ment by admitting that there were other forms of violence. What was this heresy of Mr Todd's - this swing to the right on the part of a once great, extremist trade union? Delegates must have had a tense few moments of waiting.

But Mr Todd went on to explain that he was referring to the violence that destroys jobs, judicial violence, state violence," so all was well.

But it was not all soup kitchens, heroically injured miners and violent policemen. Few of us like to spend a whole day having fun. There was alo the more tedious, though essential, issue of candidate reselection. This, in essence, is the quarrel about who should choose Labour candidates - the party mem-bers as a whole of a small conspiracy of fully paid up, respected extremists. The left favour the latter - Mr Kinnock, since becoming leader, the former.

An acrimonious debate ensued. Mr Eric Heffer, MP intervening during four com-plicated votes held to resolve the issue, observed: "And now you have decided well, I don't know what you have decided." Not for the first time. Mr Heffer had spoken for the Conference as a whole.

But on this occasion the crucial difference between him and the Labour movement as a whole was that he was the conference chairman.

The papers

The Daily Star, commenting on the first day of the Labour Party Conference, says that the Labour Party should concentrate on Party should concentrate on winning the next election. The paper suggests that it is a lesson Mr Neil Kinnock 'must hammer home again today, in his keynote speech to conference'. It adds. "Blaming the police for all the violence on the miners' picket lines may win the enthusiastic applause of a few hundred delegates. But it's guaranteed to drive away potential Labour voters in their tens of thousands."

The Daily Express. also com-

The Daily Express, also commenting on the Labour Party Conference, says: "The real leader of the Labour Party was revealed yesterday — Arthur Scargil!" The paper adds: "The very first day of this conference has shown that Neil Kinnock is no more leading this Kinnock is no more leading this party than a man sitting on a tiger could be said to be leading it. Judging by latest opinion polls the public has got that message already."

The pound
